Guidance Series – A Mentoring Session from eduEnigma

The intention of this session/series is to help the IT professionals and students to clear their doubts in the current context of Digital Technology trends and learn to build a better career road map. Some of the common confusion/doubts nowadays are - What would be my learning path (professional or student) in order to get a successful career, Should I discard my previous knowledge or build on top of it or embrace completely new things, what courses are appropriate for the same, will a certification help etc.

From eduEnigma, we will try our sincere efforts to provide a guidance/mentoring on the same, as we are from IT Industry only and have gone through those confusions/doubts for the last 20/25 years. We also struggled, received good mentoring, faced challenges and learned gradually. However, business is not the only objective here and truly we want to provide guidance to students and young IT professionals in order to create a better Technology ecosystem.
