

2017 CARLISLE FORD NATIONALS

Congratulations, your vehicle has been awarded the Historic Vehicle Association's (HVA's) National Automotive Heritage Award. This award is presented to vehicles that are preserved or authentically restored and are among America's most important automotive treasures.

Over the last 125 years the automobile has had a profound impact on the development of virtually every aspect of modern culture. The cars, motorcycles and trucks that remain chronicle our past and help us understand who we are, where we have been and where we may be headed. As a society, we have an obligation to preserve these historic vehicles and related artifacts as a lasting record of our progress.

Through the collective efforts of enthusiasts, specialists and professionals, the HVA aims to help ensure that our automotive heritage is more broadly appreciated and carefully preserved for future generations. The National Automotive Heritage Award is just one component of our efforts. Check out our website www.historicvehicle.org for more information on how we are documenting the nation's most significant vehicles in order to perpetuate our automotive heritage.

With over 390,000 members, the HVA is the world's largest historic vehicle owners' organization. The HVA was founded in 2009 through the support of Hagerty and became the designated North American representative of FIVA (Fédération International des Véhicules Anciens), the international historic vehicle organization.

Sincerely,

Mark D. Gessler
President, HVA
Vice President – Technical, FIVA
