

## Open Position

### **Manufacturing Engineer:**

Evaluates manufacturing processes by designing and conducting research programs; applying knowledge of product design, fabrication, assembly, tooling, and materials; conferring with equipment vendors; soliciting observations from operators

### **About Us:**

DCA Manufacturing has been a contract manufacturer for printed circuit board assembly and complex PCB assembly since 1993. Since conception DCA has grown steadily at a rate of 10% each year by constantly investing in state-of-the-art technology and equipment. DCA has won several customer service awards and Cumberland Chamber of Commerce employer of the year.

### **The Position:**

We're looking for a Manufacturing Engineer that has great technical writing skills and the ability to problem solve the launch of new products. The candidate will have the ability to foster relationships with customers and assist in facilitating new designs.

- Experience/Education: B.S. in Engineering
- Hours: 40 Hours per Week
- Wage: Based on experience

### **The Location:**

Located close to home in beautiful Cumberland, WI, DCA Manufacturing gets involved with some of the terrific schools Cumberland has to offer. Surrounded by one of the state's deepest lakes, Beaver Dam, Cumberland is also known as the Island City, making it perfect for those who love to enjoy the great outdoors.

### **Why Should You Apply?**

- Great pay
- Flexible hours
- Review capital equipment
- Growing industry
- Comfortable, clean, and controlled environment
- You're not a number, family owned business
