

## Open Position

### Test Technician:

Tests production and field service returns by interpreting schematics and test results to ensure and/or create functional circuit board for a wide variety of products.

### About Us:

DCA Manufacturing has been a contract manufacturer for printed circuit board assembly and complex PCB assembly since 1993. Since conception DCA has grown steadily at a rate of 10% each year by constantly investing in state-of-the-art technology and equipment. DCA has won several customer service awards and Cumberland Chamber of Commerce employer of the year.

### The Position:

We're looking for a Test Technician that can assist with the testing and troubleshooting of circuit boards to a component level with an emphasis on manufacturing defects. The technician will perform functional tests and troubleshoot to repair any failing product.

- Experience/Education: 2 years' experience or associates degree
- Hours: 40 hours per week
- Wage: based on experience

### The Location:

Located close to home in beautiful Cumberland, WI, DCA Manufacturing gets involved with some of the terrific schools Cumberland has to offer. Surrounded by one of the state's deepest lakes, Beaver Dam, Cumberland is also known as the Island City, making it perfect for those who love to enjoy the great outdoors.

### Why Should You Apply?

- Great pay
- Hands on problem solving
- Growing industry
- Comfortable, clean, and controlled environment
