

Sermorelin Acetate - Professional Use Guide

FULL DESCRIPTION: Sermorelin Acetate is a growth hormone-releasing hormone (GHRH) analog. It stimulates the pituitary gland to naturally increase HGH (Human Growth Hormone) levels, promoting fat loss, muscle repair, and cellular regeneration. It's commonly used in anti-aging and wellness therapies.

BENEFITS:

- Increases natural production of human growth hormone (HGH)
- Improves recovery, sleep quality, and lean muscle mass
- Supports fat metabolism and anti-aging
- Enhances immune response and tissue repair

DOSAGE PROTOCOL (As recommended by a licensed provider):

- Typical dose: 0.2-0.5mL subcutaneously before bedtime
- Frequency: 5 nights per week or as directed
- Periodic reassessment via labs is advised

USAGE METHOD:

- Subcutaneous injection (abdomen or thigh) before sleep
- Use sterile syringe and rotate injection sites
- Store refrigerated between uses
