

Replacement Of What You Need

It takes more than the internet and a furniture catalog to design the interior of your home. Do you want your home showcased or livable? Not everyone can look at a house and know how to coordinate furniture, drapes, paint, countertops, light fixtures and flooring. Your Aunt Ethel may think your home needs a lot of brocade and maple but, you may be more of a light and airy person. While you may love your Aunt Ethel dearly, she may not be the most economical interior designer.

Who We Are

We are professionals who know the correct questions to ask you, so your home reflects the story you are trying to tell. We understand and adhere to all state, local, and county codes. The last thing you want is to have your home closed to you because the guy down the street didn't pull the correct permit if your design includes adding an addition.

Your best interest is our main priority, and we are here to help you in any way possible.

Call us today and speak to one of our professionals!

Why We Do That – Only Qualified Specialists

Our interior designers know what works and just as importantly what doesn't. Are you looking for a complete makeover or just an update? If you want to upgrade for personal use or to entice buyers, we know the best way to get that done.

Benefits of Working With Us

Everyone wants a beautiful home that reflects their lifestyle, taste, and personality. Not everyone has the time, contacts, or expertise.

- Experience

As professionals, we are trained to think aesthetically. Years of training allow us to recognize what changes are needed. If you are planning on selling your home, we can show you what upgrades will benefit you in the current real estate market.

- More than just new fixtures

Showcasing a home is not only new fixtures and drapes - it is a skill. A professional designer can help you express your personality and lifestyle. When selling your home, a professional can show you what changes will make your home stand out from others.

- Curb appeal

A beautiful home is a source of pride and adds value to the neighborhood.

Why Hire a Professional

Most people know what they like or don't like about their current home. Not everyone has the time or expertise to design an interior that is appealing.

Professionals know the most reliable contractors, vendors, and tradespeople available. They are the ones who can look at your home and immediately identify things you might not have noticed. That knowledge is not only a time and money saver but is imperative to spot problems.

How do I know if I need an Interior Designer

- Your house is more than five years old.

If you haven't upgraded your home in more than five years, you will be surprised at what is on the current market. If you are planning on selling your home, it needs to be as modern as possible.

- You want a different look

Just as you get tired of wearing the same shoes, dresses, suits or coats, you get tired of the same look in your home.

- Regular maintenance

Just like a vehicle or lawn a home needs routine maintenance. Drapes can become faded from too much sunlight, and rugs can become worn from traffic. Once the kids are old enough not to spill their sippy cups and the dog has become housebroken it's time to think of improving.

Also, when the kids are leaving home, and empty nesters want to show their home as more of their taste. Turn an empty bedroom into an office or workout room. Making the house a little more adult stylish – or make it ready for all the grandkids.
