Service Project benefitting HavenHouse St. Louis: HavenHouse provides essential lodging and community support for patients and families traveling to St. Louis for medical care. Their mission aligns beautifully with our commitment to serving youth and the community, and I believe this is a fantastic opportunity for our district to make a tangible impact. ` Gov. Jennifer Bagwell

Please bring items that we are in most need of currently would be travel sized toiletries. Shampoo, conditioner, body wash, toothpaste, etc. Items that our guests may forget to pack because they are rushing to St. Louis due to an emergency or end up staying in St. Louis longer than originally planned. To have these items on hand ensures that our guests don't have to take the time or money to run to the store and purchase these items themselves. Our goal is to have the patient be the priority and we take care of the rest.
