RDP Submitted

It has been a busy few months here at CF@LANTA. Just yesterday, we submitted our Research Development Program (RDP) for renewal after over a year of preparation. The RDP was first awarded by the CFF in 2015 with the purpose of creating a multidisciplinary CF research center at Emory University. Our 2021 renewal proposal refines our focus to the pulmonary complications of CF with the theme of “**The Systems Ecology of the CF Lung.**”

No. 1

More breaking news from the world of research: it is with great pride and excitement that we share a major achievement - the Emory School of Medicine Department of Pediatrics ranked **No. 1 in 2020 NIH funding awarded to pediatrics departments!** This top ranking represents more than 1,500 active studies, 1,700 publications, and more than **\$97 million in total grants.** Thanks to this funding, our researchers have made exceptional progress in cures and treatments for childhood diseases such as cystic fibrosis.

Mark Your Calendar

Our next C.A.B. meeting will take place in about a month. We are thrilled to be joined by **renowned CF researcher Dr. Eric Sorscher**, who will be on our virtual call to share more about his ongoing research and answer any questions you have. See you there!
