

ONE-YEAR RE-DO POLICY

Revised Patient Information Document (RPID):

This document would have Annual Review Requirement.

Evaluation of the efficacy of our services will be conducted annually to assess oral hygiene. No responsibility is assumed for personal health assessments. Consequently, a one-year re-do policy is established, necessitating the presentation of the patient's file as evidence. Any concerns about exceeding the stipulated time for redo must be communicated before the designated timeline, as patients will be permanently barred and removed from our database thereafter. This policy is applicable to all patients, both existing and new.

In the event that the attending physician, who performed the original procedure, is still practicing and elects to waive fees for a replacement, such action may be pursued. However, this option is contingent upon the client's readiness and must occur within a two-year timeframe from the initial treatment, as dictated by the review process. It is emphasized that no warranties from external entities, including labs, radiology centers, and product manufacturers, are extended to patients. The care system is solely based on the awareness of a one-year redo policy without any flexibility beyond the specified timeframe. Patients are urged to adhere to prescribed oral hygiene measures and post-treatment care guidelines.

Clients are encouraged to continue their association with our services, with the understanding that adherence to the established guidelines contributes to the overall success of the treatment. The commitment to industry standards and innovation is highlighted during appointment bookings, fee discussions, consultations, and treatment support interactions. This commitment aims to secure patient satisfaction and promote the well-being of society. Clients are reminded of their responsibility to follow industry-reviewed guidelines for oral health and post-treatment care.

Should a decision be made by the treating physician not to proceed with a redo or fee waiver, no further support or replacement will be provided. We extend our apologies for any inconvenience or distress caused. Patient recourse involves seeking alternatives within the broader healthcare system. The provided implant sticker facilitates claims with Nobel Biocare and is subject to the same one-year policy for implants.

A comprehensive one-year redo awareness policy is in effect for filings, root canal treatments, crowns, and any other procedures involving time, financial investment, or effort. Orthodontic relapse is excluded from coverage due to the current state of technological advancement in the field. Patients are encouraged to support ongoing developments in the dental industry for improved service provision over time.

ONE-YEAR AWARENESS POLICY FOR ELITE DENTAL CLUB MEMBERS

Acknowledging the trust bestowed upon our patients or clients, the stipulations outlined herein exclusively pertain to our elite dental club of doctors, as featured in our exclusive OPEN annual 3rd edition dental Fenetre newsletter onwards. Membership in this club is contingent upon the doctors having their dental license renewed annually by the Karnataka State Dental Council (<https://ksdc.in>) or equivalent boards. This annual renewal gesture is made in good faith and reciprocation to our clients, customers, or patients. It aims to empower patients to make informed choices when selecting a qualified practitioner from our endorsed list, without interference from associations, organizations, universities, colleges, aligner companies, chain clinics, and others in the dental industry.

The supervising doctor, inclusive of dental interns, dental graduates, or undergraduate trainees, bears the responsibility of ensuring that assistants, dental assistants, technicians, nurses, and team members perform tasks commensurate with their training and licensure. Both on-site and remote work, as in aligner cases, must adhere to due diligence and established protocols. Any deviation from these standards may lead to ethical violations and legal repercussions, including potential imprisonment, in accordance with the applicable legal framework.

To avert such incidents and ensure compliance with ethical and legal standards, we adhere to the Oath of Hippocrates, emphasizing the principle of "do no harm." Additionally, we commit to observing THE LAW. Issuing false notices for malpractice against our protected panel of doctors is strictly prohibited. The one-year awareness policy, as mandated by THE LAW, is established for the overall promotion of good health.

Misconduct within the organization, as aggregated by www.Navigational.ai in the dental industry, is not condoned. We strongly recommend training by HR personnel for doctors and team members, and immediate family members engaging in misconduct will be promptly removed from the system until corrective actions are taken or a mental health expert is consulted.

Our panel of doctors, exclusive to the elite dental club, is entitled to charge premium fees for their services without scrutiny. However, the extent of fee-sharing, inclusive of taxes, is subject to a mutually beneficial understanding that aligns with the well-being of the organization and the doctor's family. This symbiotic relationship is intended to foster comfort, happiness, and contentment while providing valuable services to society.

We express gratitude for the support, encouragement, and shared love that contributes to the growth of our humble elite dental club. Patients and clients are urged to share [this link] for health updates. Private dental practices interested in joining our program may do so through a consented process, with the Google form link shared exclusively with the establishment, maintaining confidentiality.

Under a single clause, the treating doctor, irrespective of seniority, is entrusted with the authority to determine fees within our clinic associations. This privilege extends solely to immediate family members by blood, law, adoption, or marriage. Lab and service providers' charges are negotiable, while product charges may be exempted if available in our inventory. Once entered into the clinic, no refunds are entertained, emphasizing the importance of reading the oral consent and other pertinent details.

The one-year awareness policy precludes any redo requests after the stipulated timeline. In cases where the treating doctor is still practicing and expresses a willingness to waive fees or replace products, such actions are contingent upon the client's readiness and must occur within a two-year timeframe from the initial treatment.

For individuals outside the immediate family of the treating doctor, including other doctors, consultation fees are waived. This generosity extends to extended family up to 1st cousins, close friends up to 10, and the team and their immediate family during working hours, at the treating doctor's discretion. Variable fees for treatment solutions are determined by the treating doctor based on the perceived value provided to the patient or client, fostering a trust-based foundational relationship for mutual growth and prosperity within our beloved elite dental club. This privilege is contingent upon the individual's commitment of time, expertise, and skills, which may be withdrawn at the discretion of the provider.
