Book 2 Original

Different stages of life Is the different forms of In actions and on earth we're sitting in a cocoon's once we're awakened or enlightened as a species by discovering the source of light energy we'll metamorphosis into twin flame 2wings once they suddenly realise the bondsOf humanityWhere not respected by a nuclear bomb for destruction still it's taken them on a path they need to change as inNow there's no past noFutureOnly present thereforeTimeless our love God's handWith our work people shall realise what the overlookedWas if the construct they would see photons of light from the sun's energy of destruction therefore we can't see the destruction force of energy of God only pure source of energy of light and from that arises our secret to break the cocoon and discover the universe turning into butterflies zipping across space whenWe crack open that photon of light in all of us

To break speed of light equation which is only barely and understanding but a direction for humanity to break all barriers every thought humanly possible I just knew it there lies our purpose in life a humble oral lasers machine photons and AI in dentistry in all its aspects God is says it's so observation powerful

You and I opened my fiancé loving communication see the daily little things those photons activities coming to earth filtered the eyelids Shiva's third eye prevents ozone not torn apart by Hitlers destructive force of rocket engines for his ultimate revenge of ground zero (preventive care) from Sun's light source nuclear power to destroy earth those tiny particles called photons only come through and have constructive power beyond our current understanding we need to discover as they clear security to earth

Thank you for this opportunity to serve your parents first and protect your sister on today Rakhi and sorry for hurting others, powerful in working together learn this biggest lesson in life we are ultimately responsible as we're one heaven is in you based on your consequences smile wide on your next visit to do the dentist because you know you've done Good work brushed twice daily eaten well rest well

Loved one slept wellYour choice to leave this nuclear arms race out of fear and start developing you need to have some regret and guilt turn into something constructive loving like your choice your decision all

I say Work out issues lovingly together you don't need third party mediators with own agendas Even the most meaningful one Therefore the trust between doctor patient sacred

Husband wife sacred with God as witnessed saying as profound as he's the only one witnessing or observing everything learn the art of observation see how beautiful his creation creates Creator Nature In this real life

 Surya the life giving force pouring down the Photons and mature nature when nestled comfortable in the Universe starts creating like a patient sitting in a dental chair while the Dentist doing his artwork

And more privately between husband and wife
You can't change action
It's permanent what you can change is thought intent

Sodon't change your spouse comparing to others or some image you hold of some movie star
Or fairy tale in your head those are only
Make believe

thoughts Or
illusions Maya
What is real is your relationship and man or woman you're with The
action
Played
On happily For
each other
And therefore society
And universe
Smiles for it's created something beautiful the artist appreciate His art

showing other artist

Dentist

See what I've done and patients like wow what an experience living the moment that's
where you'll feel heaven inside

And heavenly words flow out

And that's the right actions consistently everyone including your wife husband the filter
the ozone not lost by climate change of situation good bad ugly ever change So you have to
decide to the man of your word if those heavenly feeling words are pouring out for actions
which are right consistently filtered by your partner like cleaning water being installed RO
in our dental clinic or our rivers

Lakes and ocean

The transformation to feel the presence of heaven is from within starting with love you
feel from your parents your sister on day of Rakhi you

Protect like our ozone which is going filter good into this world for other twin flames
flying like the two parts of a butterfly  wings connected at the body by the life giving
force pouring down from the sun into our head we cover from humility during sacred
moments like tying off Rakhi by a sister to protect her

Like a doctor says after the crucial dental degree the only one which really matters to each
doctor when we take that sacred oath to do no harm

And pass down the healing force learn in our minds connecting way above to the source like
our father's blessings us with our mother's loving nature to unconditionally love and
protect together when a husband and wife first time touch their feet after marriage so take
off your footwear entering a clinic or wear ozone like protective boots and maybe then go
back for the first phela pheras Back to the parents to girl as per each Faith get their
blessings and move on to  in your own movie together called life

And support each other through thick and thin never leaving each other's sight or threatening to like nuclear as it's not loving understanding relationship work to build our dear nation's learning from the couples in your societies families then we'll have better communication relationships with our neighbors and not 🙄 evil eye

Their people or resources

Love thy neighbor now we can move forward to then working together as a collaborative enlightened society working towards the greater good of understanding this beautiful artwork in our clinic of the

Seven chakras to bring peace and harmony as you enter by a mother And then

A dental couple sorting out differences prayer for a dentist then our uniqueness innovation of fee structure hanging

Finally see okay he's a licensee of practice with updated knowledge and information desk

with a notice board for any updated information water 💧 the seat of life where the seed grows if you wish to

Quench your thirst or tea which runs this country say thank you God for the creation by giving your fee to enter not in temple you feel the energy there the most calm peaceful place to visit but also work is worship temple where all the 🌄 is done in all the fields thank God for us in his reflection seen couples reflecting each other doing pay for their services exit

Quietly saying what an experience to others go their to that planet

what an experience as we're all on our journey in space

Like those photons you see

Thank you 💎 very much for your help

Worship like the Incas

Sometimes one animal sacrificing for sustenance of other with love fathers mothers on the borders do institutions don't fall soft power affecting society

Or massive invasions to leave in harmony you have to look 🙄🙄🙄 deep never seen in the depths of heart of months

Not even stepping on an ant 🍉🍉 just to acknowledge he's doing hardworking nature like a dentist 🦷🦷 operating on mutually beneficial relationships trusting patient the bond is with patient to keep him safe like a father doing his Kanye Dane from his protection always to there to even stronger younger forces to look after with his reinforcement if needed

So don't disturb guardian parents loved ones

Accomplish what the creator us doing through the dentist 🦷🦷 healing his creation to do his duty We understand the environment is dirty not in our clinic every observation of yours in noted and jot it done,

Pathway ahead

Combyourhairdown don't truffle feathers give in if required never give in doesn't mean keep fighting persistence is different from patients hardworking people be patient love your wife loved ones self parents fiancé respectfully love as finally if they're not happy what's the point they'll leave with them all the treasures to understand to receive the biggest

gift 🎁🎁💖💖 you can get from your creator is happiness and you'll wonder 🤔🤔
how don't go into the dream 🛏🛏 at night you'll have your time to connect to the
source

The biggest treasure you can receive is happiness in your heart mind body soul spirit and that's the ticket to heaven all of our eventual destination of salvation and he's teaching you in your journey how by not being selfish otherwise he doesn't wish for you in heaven so then how learn from your wife truly your best never give in if she's the right one eventually you'll know inside she's the one you trust do anything to keep her happy eventually it glow to your parents patients society everyone slowly they might start reciprocating keep giving and then you have found your happiness your biggest treasure salvation right here on earth watch that setting sunset   with her the rising surya namaskar dat on Independence

Day for my mother maybe the joyful feeling of finally seeing

The start of life

Happiness knowing you are part of the creation process without any grand gesture or announcement just touching your own feet   you're part of this creation a namastey to start not welcoming the other but welcoming them behind the namastey then prostrations for all cures solutions gifts photons have given you thank and say in your might I would waste your resources if you keep this creation immortal including no           wastage build something beautiful by having a light hearted funny so that

Light shines through receiving a fee or giving them you're sharing To care

for the one that matters you

Because you are all of the creation it's all you all him that's the finally realisation of consciousness to progress you keep giving dirt to Mother Nature she keeps cleaning a hygienist or dentist keeps cleaning what do you do

We'll as per my understanding know the process is coming from the salivary glands but at least clean up your mess meaning smoking stains paan

Etc

Don't make such a big mess with Mother Nature she cleans but help by recycling start by speaking the truth or honestly express what you feel knowing or understanding that would be a nice G20 summit to clean up

Recycling and recycling maintaining what we have with gratitude  for the happiness we feel you might never

How Mother Nature operates That's her secret   when you're ready to know she shares like an invest in her creativity Not to damage her so keep looking

And all the AnswersThereFriendship's lifeMake friend with equal partner points of
