

Our Brand Framework

Leading with Robustness™

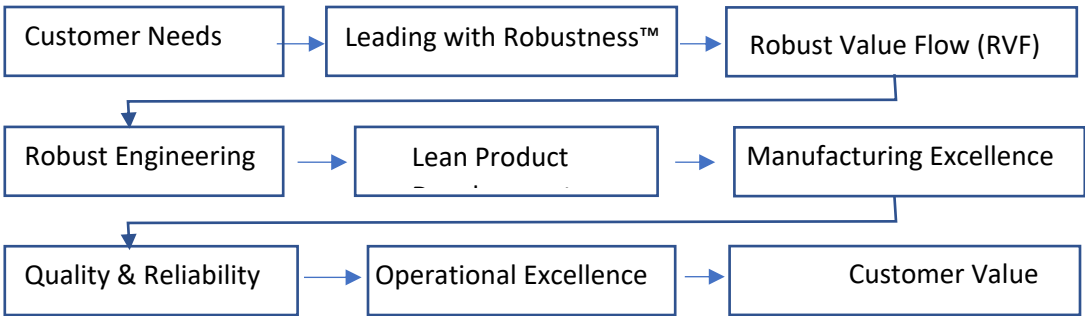

Enhancing Lean Thinking with Robustness Thinking

Engineering leadership begins with better decisions.

By integrating **Robust Engineering** with **Lean Thinking**, we help organizations build robust products, resilient operations, and sustainable competitive advantage.

Our Philosophy	Our Framework	Our Outcome
Create. Protect. Sustain. Value. Every engineering and operational decision should create customer value, protect that value from variation and uncertainty, and sustain it throughout the product lifecycle.	Robust Value Flow (RVF) RVF integrates Robust Engineering, Lean Product Development, Quality, Reliability, Manufacturing, Supply Chain Excellence, and Predictive Health Management into one practical engineering framework.	World-Class Performance • Higher Quality • Greater Reliability • Stable Manufacturing • Resilient Supply Chains • Operational Excellence • Sustainable Competitive Advantage

The Leading with Robustness™ Journey

Our Commitment

Create Better Decisions.

Build robustness early through engineering leadership, lean thinking and systems thinking.

Our Brand Framework

Protect Customer Value.

Reduce sensitivity to variation across product development, manufacturing, and the supply chain.

Sustain Competitive Advantage.

Continuously improve quality, reliability, operational excellence, and lifecycle performance.

Outcomes

World-Class Performance

- ✓ Better Products
- ✓ Better Decisions
- ✓ Better Manufacturing
- ✓ Better Supply Chain
- ✓ Better Reliability
- ✓ Better Customer Value
- ✓ Sustainable Competitive Advantage
