

W A C O N I A H

WASHINGTON, ARIZONA, CALIFORNIA, OREGON, MONTANA, WYOMING, IDAHO

May 2026

Friends! Because that is how I see you all, so many wonderful friends! And I am looking forward to the Pacific Region Convention in California in October and meeting new friends! You will find out all about the "Palm Trees 'n' Ocean Breeze" convention in this issue of the WACONIAH. I hope many of you will be able to go! It will be FUN!

Before October, I will attend the National Convention in St. Louis, the one-day convention in Las Vegas, the full convention in Washington State and the one-day convention in Oregon. I am looking forward to meeting many new and old friends!

I hope some of you were able to attend our Firewise webinars. Susan Piper, who lost her home more than 30 years ago, to a massive fire in Oakland, CA and has been involved in educating the public to be prepared ever since. She has put this whole series together. We couldn't have found a better promoter for my special project! Thank you, Susan! We finished the first part of our series. The next one will be on Monday August 10th at 2 p.m.: Personal and Family Preparedness Before a Disaster. Let us know what you thought about the webinars. I know some of them are not gardening related, but still extremely important for anyone.

One of the jobs of the Pacific Region Director is to review the scholarship entries that National Garden Club has received. I was warned that it is a big task and to start early. Well, it is time consuming, but it was inspirational! All the entries were worth a scholarship! All these amazingly smart, dedicated, innovative and hardworking young people who have dreams. I learned a lot from all these applications!

For example: Have you heard of a soft-landing garden? It features native plants beneath a keystone tree, intentionally designed to support insects and birds. Ninety percent (90%) of caterpillars require both a tree canopy and the ground below it to complete their metamorphosis. A lawn monoculture below the tree compacts the soil and removes leaf litter, reducing cocoon survivorship and biodiversity.

Each one of the applications had something unique that they wanted to study. I wish I could invite each and every one of them to come and speak to the Garden Club!

I have hope for the future! One of you sent me a pretty card with a beautiful saying: "In the Garden of Life, Friends are the Flowers".

Love to all my friends from Tanja!
Pacific Region Director

Congratulations are in order!! The Arizona Federation of Garden Clubs, Inc is extremely excited and pleased to have completed Class 1 and Class 2 of the AFGC Landscape Design School Series 3. Thank you to Peggy Ahola, AFGC Design School Director, and Jennifer Moreland, AFGC President for getting the AFGC Landscape Design School back underway after several years! And very special Thank Yous to the School Instructors, Alba Rodriguez, Erin Hutton, Liz Lonetti, Noelle Johnson, Kristen Battafarano, and Robbie Cole, who did a marvelous job in sharing their expertise, understanding, and perspectives on the various Landscape Design topics.

Everything went very smoothly with the Zoom format (one good thing to come out of COVID!) which allowed participants from all over the country to join in for these Classes. Garden Club members, Master Gardeners, Landscape professionals, and every day gardeners were well represented.

The AFGC will be continuing the Landscape Design School Series 3 with Class 3 and Class 4 coming in November and December of 2026. Please watch for more details coming soon. Course topics are listed on the Arizona Federation of Garden Clubs, Inc website under Sponsored Schools.

And plans are already being drawn up to offer the Landscape Design School's Gardening Class in 2027! We hope you will join us for all these exciting educational opportunities!

Jan Wells - AFGC Schools Marketing Coordinator

Looking for a unique gift for graduation, Mother's Day, Father's Day, a birthday, or a special thank you? Consider a Life Membership donation to support the PRGC Scholarship Program - honoring someone while making a difference.

A \$75 donation (fully tax deductible) grants Life Membership, a pin, certificate, and welcome letter.

To apply, complete the application ([://pacificregiongardenclubs.com/life-membership](http://pacificregiongardenclubs.com/life-membership)) and send it along with your check to:

**Pacific Region Garden Clubs Life Membership Chairman,
Sue Bennett: [sue c bennett@att.net](mailto:sue_c_bennett@att.net).**

Hope to hear from you soon,

**Sue Bennett
PRGC Life Membership Chairman**

Enjoy an evening of Pacific Region Bingo – Banquet Wednesday, October 14

Robin Pokorski will entertain us with customized bingo games with fabulous prizes.

Oh, come on!
Join us – it's going be
great fun!

PRGC Judging of NGC Awards

By Pat Clayes, PRGC Award Liaison to NGC

Last fall, Marilyn McDonnell, NGC's Awards Chair, asked the eight Regional Directors to help judge "several" NGC award entries. Pat Clayes (California) volunteered to serve as PRGC's Award Liaison.

The following volunteered to be part of the PRGC judging team:

- Sue Bennett (California)
- Jane McKee (California)
- Sheila Parcel (Alaska and Arizona)
- Judy Stebbins (Nevada)

The "several" entries turned out to be fifty-five entries and were evaluated by the four judges, including Pat Clayes. The entries assigned to PRGC: CE-4B Roadside Plantings; EC-3 Wildlife Survival; G-1 Container Gardening; MAE-4E Manuals/Handbooks; MAE-4D Newsletters/Magazines/Bulletins over 24 pages; and MAE-2B Website Professionally Designed.

PRGC was the first Region to complete its judging task, well before NGC's deadline!

If PRGC is asked to help judge "several" 2026 NGC award entries, more judges will be needed. Please do not hesitate to volunteer to help. Judging is a great way to see what other NGC organizations in the country are doing!

Spread the Word !

State Presidents, District Directors, Club Presidents, PRGC Board Members and All Garden Club Members in the Pacific Region: The 2026 Region Convention will be hosted by California Garden Clubs, Inc. in Thousand Oaks, California October 12th-14th. Tours will take place on October 10th & 11th. The Call to Convention is included in this issue of

WACONIAH and posted on our website. You can register now and those who register before August 1st will be entered in a drawing for a fabulous prize. By the time you read this online registration by credit card will be available.

Mark your calendar. Share the news with your club members. Submit your registration. Come to sunny Southern California in October for Palm Trees 'n' Ocean Breeze.

Greg Pokorski
Convention Publicity Chairman

Pacific Region Governing Documents

By Greg Pokorski, Organization Study Committee Chairman

Governing Documents for Pacific Region Garden Clubs, Inc. are the Bylaws, the Standing Rules and the Convention Procedures. These are posted on our website. Board members (including officers, state presidents, former region directors and all chairmen) should be familiar with all of these. Suggestions for changes (which are enacted at our annual conventions) may be sent to this chairman for consideration by the Organization Study Committee. In order for changes to be considered at the 2026 convention, please submit any recommendations soon, and no later than July 15th. GregPokorski@earthlink.net

Parliamentary News

By Greg Pokorski, Pacific Region Parliamentarian

February of this year marked the 150th anniversary of the first publication of Robert's Rules of Order in 1876. Henry Martyn Robert was not trained as a lawyer or politician. He was a general in the U.S. Army Corps of Engineers who became interested in meeting procedure after being asked to preside over a church meeting that quickly became confusing and disorderly. That experience led him to study parliamentary law and create a practical guide that ordinary citizens could use, not a scholarly treatise. He wanted a guide that would help real groups conduct real meetings.

It is remarkable that a 19th century book still shapes meetings today. The original pocket-sized volume has evolved into a more detailed and comprehensive work. Robert's Rules of Order, Newly Revised remains the most widely used parliamentary authority in the United States. For 150 years it has helped groups move from disagreement to decision in a fair and orderly way. That is worth celebrating.

Reference: 150 Years of Robert's Rules of Order by Jim Slaughter

PACIFIC NATIVE TREE: DOGWOOD (*Cornus nuttalli*)

Lori Robinson, Chair – Wildflowers

Phenology: *Bloom Period:* April-June, flowering may occur again in late summer. *Fruit ripens*-September to October.

Propagation: Seeds should be collected in fall, removed from their fleshy fruit covering and planted immediately into outdoor seed flats. Germination may take 18 months or more. Scarification and a warm stratification at 60°F (15°C) for 60 days followed by a cold stratification at 40°F (4°C) for 3-4 months may hasten germination. It is also possible to propagate by layering.

Use by People: Natives used the hard, dried wood for harpoon shafts and other implements. The wood has also been used to make thread spindles, golf club heads and piano keys.

Use by wildlife: Deer and elk will browse the leaves. Small mammals and birds such as grosbeaks, cedar waxwings, and woodpeckers eat the fruit. It is an impressive sight– Pileated Woodpeckers and Flickers in a Dogwood tree feasting on the berries!

The “Dogwood” blooms at Easter in the Pacific Northwest. Jesus was crucified on a Dogwood Tree. It used to be a hard wood tree; but now it is weak. I notice red veins on the petals of the flowers in the fall. It is supposed to represent the blood of Jesus Christ. The flowers are beautiful when the tree is in full bloom.

Pacific Dogwood, *Cornus nuttallii*

Pacific Dogwood

The Dogwood Family–Cornaceae

Cornus nuttallii Audubon ex Torr. & A. Gray (KOR-nus new-TAL-ee-eye)

Names: Pacific Dogwood is also known as Western Flowering Dogwood. It was named after Thomas Nuttall, an English botanist and zoologist.

Relationships: There are about 100 dogwood species worldwide found primarily in temperate regions. Three Dogwood trees and a couple of shrub species are found in the eastern or Midwestern United States. In our region, besides the Pacific Dogwood, we have a shrub, Red-Twig Dogwood, *Cornus sericea*, and a groundcover, Bunchberry, *Cornus canadensis*.

Distribution of Pacific Dogwood from USGS ("Atlas of United States Trees" by Elbert L. Little, Jr.)

Distribution: Pacific Dogwood is found from southwest British Columbia, western Washington and Oregon and on the west slopes of the Californian mountain ranges. There is also a disjunctive population in northern Idaho.

Growth: Pacific Dogwood usually grows to about 20-30 feet (7-10m), but can grow to be 90 feet (30m). It may live to be 150 years old.

Habitat: Pacific Dogwood prefers moist, well-drained sites and is most often found as an understory tree in fairly open, mixed forests.

Typical parallel veining pattern of a dogwood leaf, turning red in fall.

Diagnostic Characters: The Pacific Dogwood leaves have the veining pattern typical of all dogwoods, where the nearly parallel secondary veins branch from the midvein and curve towards the tip as they near the leaf edge. Like most dogwoods, they have opposite leaf arrangement. The tiny, greenish, purple-tinged flowers are pressed into tight hemispheric clusters. These clusters are surrounded by 4-6 white (sometimes pink-tinged) bracts, creating a showy inflorescence with the appearance of one large flower. Each flower cluster develops into a bumpy ball of hard, red fruits in the fall.

I

In the Landscape: This attractive tree is often one of the most sought after native for gardens, but unfortunately larger specimens do not transplant well, and it is sometimes difficult to grow in containers. Small trees may sometimes be available in specialty nurseries but they are usually in short supply. Pacific Dogwood is also very susceptible to a fungus disease called Dogwood Anthracnose. This disease causes large brown blotches on the leaves and will also cause twig dieback. Many people are willing to accept this risk in order to enjoy the spectacular floral display this tree provides in the spring. Tall, flowering, Pacific

Dogwood trees are most glorious when they are pressed up against the edge of a Douglas Fir forest. This tree's beauty continues into other seasons with red berries, pinkish fall foliage, and an attractive branching pattern.

Lots to celebrate between now and the next issue in August.

Memorial Day, Monday, May 25th

Juneteenth, Friday, June 19th

Independence Day, Saturday, July 4th

Wishing you all a fun and safe celebration day for each of these special moments.

After all the festivities, don't forget to send in your contributions to the August edition, between July 15th and July 31st, with August Waconiah in the subject line. Thank you.

Happy Summer Gardening!!!

MyrnaCabanban, Editor

PrgcWaconiah@gmail.com
