

The background of the entire image is a cosmic scene featuring a deep blue gradient at the top, transitioning into a dark space filled with stars and nebulae. Two prominent diagonal bands of light, one in shades of purple and pink and the other in shades of blue and white, cross each other in the lower half of the image, creating a bright, glowing intersection. The title 'INFINITE BEING' is centered in the upper half, with the word 'INFINITE' on the top line and 'BEING' on the bottom line. A large, stylized blue infinity symbol (∞) is positioned between the two words, acting as a visual separator and a central element of the design.

## THE AWAKENING

The program is designed and bespoke to YOU based on your goals. It would be a combination of the following modalities.

### Theta Healing

Theta Healing is a meditative technique conducted while the client and practitioner are in a theta brainwave state - an altered consciousness where brainwaves are slowed to a relaxed mode. You're working with advanced science and quantum physics and the movement of energy, atoms and physical particles in order to allow the body the conditions it needs to heal.

This technique teaches one to connect the conscious and unconscious self with the purpose to acquire a better quality of life by aligning their thoughts and desires with their life experience.

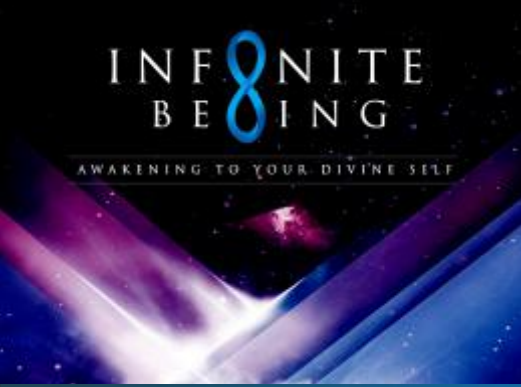

## THE AWAKENING

### Family Constellation

Out of love and loyalty, we often unconsciously carry the traumas and destructive patterns of our ancestors, which may manifest in our daily lives as unresolvable personal problems and relationship issues.

Through the gentle, yet powerful process of Family Constellations, we enter into connection with our ancestors through the energetic 'Knowing Field.' Our entanglements within our ancestral family are gently and respectfully uncovered. The experience is sacred, cathartic, connecting, and profound.

At any point in a family system a disconnection or separation creates an energy blockage that does not allow the energy to flow freely from one generation to the next. The family constellation not only allows the disconnection to become visible, but also it is a vehicle through which the reconnection of the family members can take place.

## THE AWAKENING

### **Emotional Empowerment**

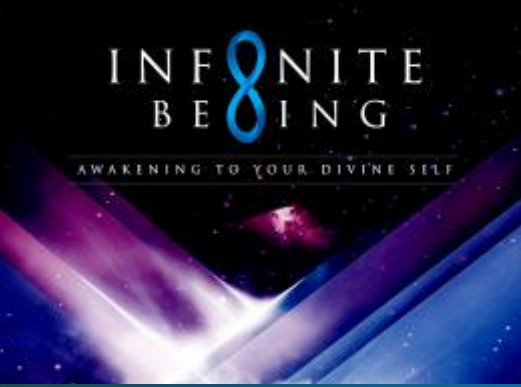

A mind-body modality that is safe, gentle, and non-invasive, EE is a calming technique which uses energy meridian points to modify the stress response.

Combining the physical benefits of acupressure with the cognitive and linguistic benefits of conventional talk therapy, EE promotes somatic awareness while enabling positive cognitive shifts. EE operates on the premise that no matter what part of your life needs to change for the better, there are unresolved emotional issues in the way.

Tapping as we verbalise the problem allows an acknowledgement, flow and release of uncomfortable feelings like anger, hurt, guilt, fear or grief which may be negatively affecting our daily lives.

Using this technique helps us to become aware of the negative thoughts and beliefs behind our emotional experiences, so we can change them to more helpful ones.

## THE AWAKENING

### Cosmic Life Coaching

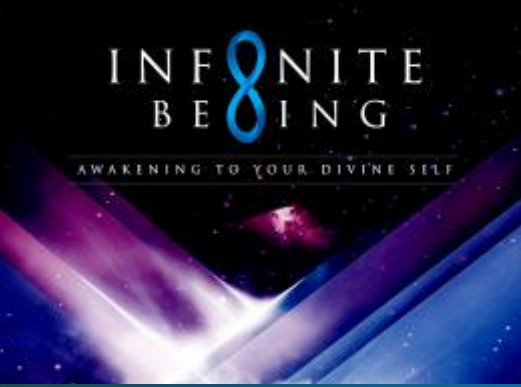

The premise of Cosmic Life Coaching is that our beliefs create the conditions of our life. If we wish to change our life, we need to envision the new possibility and transform the limiting beliefs that are creating the current situation.

If you are doubting that YOU can truly have it all, uncertainty and overwhelm are natural. They are designed to surface just as you are coming out of your comfort zone.

If you have tried in the past, but then pulled back when fear crept up this time will be different because we will create the tools that you need to overcome your fears, release the doubt, and forgive your past.

Bringing alignment in your beliefs, vision, purpose and action to achieving your goals.

## THE AWAKENING

### Inner Child Therapy

The cry we hear from deep in our hearts, comes from the wounded child within. Healing this inner child's pain will transform negative emotions.

Inner-child work is a powerful tool for healing from psychological trauma, dysfunctional patterns, and self-harming behaviors. The inner-child is not a literal child, it is a metaphorical "little you".

By connecting with our inner-child, we gain access to new information about our unhealed wounds, and the needs that may not have been met when we were actually children.

Then, "reparenting" becomes the process of meeting those needs and practicing self-care so we can operate in the world as happy, functional adults.

Payal is a wonderful spiritual coach. She has supported me in building back a relationship that I thought was irreparable.

With the use of her powerful questions, it got me to realise that the only thing that was holding me back, was me.

With the use of visual experimentation, I was able to literally see the key that I didn't want unlocked and by the end of 60 minutes, I was opening the door to what I wanted my true reality to be.
