

# PORTABLE NEBULISER SPRAYER

## SANITIZE AND CLEAN WITH A SIMPLE ACTION

### Characteristics

The **Portable Nebulizer Sprayer** is able to generate a nebulization process in a very simple, fast and efficient way. The jet is sprayed is generated by a multi faces heat converter which is internally fed able to produce molecules of up to 0,5 nm. The reduced dimension of the particles exhausted is able to reduce the time of treatment while drying out. The handle grip is comfortable and non-slip.

With 30ml large capacity water tank, a tank of water can last up to 10 minutes, time saving. Made of quality PA plastic material, durable to use.

### Why Mini Nebulizer?:

It is ideal to clean and sanitize any surface or parts that require deep cleaning and cleansing of some sort. If applied with the right detergent solution will kill 99.9% of all bacteria and virus lingering on surfaces.

### General Important Notes

- 1- Use in conjunction with advised antibatcterial solutions
- 2- Do not spray directly onto eyes
- 3- Advised to wear a mask while using spraying the gun
