

# OSYRIS 2626 TP

*Metalworking*

Long term rust preventive oil

## PRODUCT PROFILE

Osyris 2626 TP is a unique blend of refined hydrocarbon, synthetic dialkyl ester and film forming dehydrating additives. These additives wet the metal surface and displace the moisture while hydrocarbon present evaporates to form a thin soft greasy film to compact the effect of corrosion. Exhibit good salt spray and humidity resistance character

## APPLICATIONS

For the protection of precious engineering, auto components as well as steel strip & tubes from corrosion.

## ADVANTAGES

- **Reduces rejection and cost of poor quality** due to its excellent rust prevention character
- Balanced hydrocarbon base helps in reducing evaporation loss thus avoid **thickening of fluid and excessive consumption**.
- Built-in adjuvant helps in quicker displacement of water and settling of sludge thus **improves aesthetics and productivity**.
- Lower surface tension nature helps in **increased spread ability, shorten draining time and wastage**. Brings down consumption of oil/component
- **Versatile in humid atmosphere** due to its non-emulsifying nature.

Typical Characteristics	Reference Method	OSYRIS 2626 TP
Density at 29.5°C	ASTM D 1298	0.812
Flash point PMCC, °C	ASTM D 93	40
Water Displacement	IS 1154	Passes
Film thickness (microns)	IS 2079	4- 5
Finger print test	Internal	Passes
Protection – Indoor Outdoor	Internal	6- 9 month 2 months
