Who We Are?

With roots dating back to 1995, Granite Mountain Stone Design has grown into a trusted name for high-quality, custom stone fabrication. Founded by Ed Charles and now led by Brent Charles, we've built a reputation for exceptional workmanship, customizable solutions, and superior customer service.

As industry leaders, we specialize in delivering tailored stone products for builders, architects, and designers, with expertise spanning construction, heavy industries, monuments, and architectural projects. Our commitment to innovation, long-term partnerships, and local economic growth ensures we meet the evolving demands of modern commercial spaces—on time and with precision.

Brent Charles with his father Ed at the Lac du Bonnet facility

No job is too small, too large, or too remote. Whether by air or water, we can reach any destination. There are no limits to how far we will go.

Our fabrication facility is equipped with modern amenities and industry-leading capacities

COMPANY SNAPSHOT

Business POC: **Brent Charles, CEO**
(204) 345-2765 ex. 101
bcharles@granitemountain.ca

Service Area: **Manitoba, Eastern Saskatchewan and Northwestern Ontario**

150,000 sq. ft. = 60 work weeks
Access to partners with similar assets

Core Competencies

We bring a dedicated team, unmatched expertise, and a focus on quality to every project. Our proven ability to meet schedules and deliver superior build quality has earned us long-lasting partnerships with builders, designers, and architects. Backed by industry knowledge and a trusted network of stone experts, we ensure precision, reliability, and exceptional customer service — every single time.

Key Differentiators

We deliver fully customisable solutions tailored to your needs. With an average of 30 years of team experience, we excel in every stage of fabrication and installation. By eliminating confusion and focusing on flawless end results, we consistently meet our promises and build trusted, lasting partnerships. Known for tackling heavy, complex projects, we lead the market with precision, dedication, and a commitment to excellence.

Payworks Headquarters

INTERIOR STONEWORK

The new **Payworks** office building in Winnipeg, Manitoba, is a beautifully crafted, four-storey tribute to the company's focus and priority: its employees. The workforce management solutions company was founded in 2001 and has been headquartered in Winnipeg ever since. The new space allows **Payworks** to deepen its investment and long-term roots in the city's south end, and it was designed by MMP Architects to accommodate continued growth.

The Payworks Headquarters project was a testament to precision, ingenuity, and innovation. Tasked with fabricating and installing over 55 slabs of dark quartz stone, this large-scale project spanned multiple office areas, boardrooms, bathroom vanities, the lunchroom, and feature walls.

*Meeting contemporary design requirements
meant attention to detail at every step*

The material—a sleek and sophisticated dark quartz—was chosen to complement the building's modern aesthetic, bringing an air of timeless elegance and understated luxury to the space.

Meeting contemporary design requirements meant attention to detail at every step, from precise cutting and finishing in our fabrication shop to seamless installation across various surfaces. However, the project wasn't without its challenges. Amid pandemic-related delays in material availability, our team remained agile and proactive, ensuring the workflow stayed on track without compromising quality. Through teamwork, dedication, and creative problem-solving, we delivered a final product that harmonized durability and design—elevating the Payworks Headquarters into a showcase of refined craftsmanship.

The result is a space where the sleek stonework serves not only as a functional element but also as an integral part of the building's architectural story—modern, polished, and built to inspire.

Richardson Building PLAZA PLANTERS

Location:

1 Lombard Place, Winnipeg, MB

Construction:

Lead Masonry

At the iconic Portage and Main intersection, we had the opportunity to clad six large planters at the base of the Richardson Building with Cambrian Black granite, a classic Canadian stone renowned for its durability and timeless appeal.

*More than
500 square feet
of natural granite
perfectly blending
form and function*

*The planters light up creating
a stunning effect in the dark*

Canadian classic –
Cambrian Black granite

Designed to endure the city's infamous -50°C winters, this project required precision and resilience. The horizontal surfaces feature robust 3" thick stone, ensuring strength in heavy-use areas, while the vertical panels are fabricated from 0.75" thick stone for a seamless, refined finish.

In total, more than 500 square feet of natural granite was expertly installed—perfectly blending form and function while enriching this iconic corner with the enduring beauty of Canadian stone artistry.

Seal River Crossing sculpture found at the plaza between the Fairmont Hotel and the Richardson Building fabricated by us with natural stone.

Anti-skateboarding notches were incorporated during the fabrication process.

Raymond S. C. Wan Architects

RECEPTION DESK

Location:

50 Willow Ave, Winnipeg, MB

Cabinetry:

Altima Cabinet Works Ltd

For the reception desk at **Raymond S. C. Wan Architects**, we crafted a stunning piece using Hanstone Royale Blanc quartz. This pristine ivory surface, free of bold patterns, brings an air of refined simplicity that enhances both contemporary and classical design aesthetics.

The desk's clean, modern lines are a perfect reflection of the firm's architectural sophistication. Meticulous attention to detail was essential to achieve the intricate design, including the striking 45° light strip feature on the side, which adds subtle visual interest and highlights the workmanship.

This project is a testament to precision fabrication and thoughtful design, resulting in a reception desk that's not only a focal point but also a true architectural statement—worthy of the firm it represents.

Victoria Inn Hotel & Convention Centre

HOTEL FRONT DESKS

Location:

1808 Wellington Ave, Winnipeg, MB

Cabinetry:

Altima Cabinet Works Ltd

We had the pleasure of crafting two stunning reception desks for the Victoria Inn Hotel & Convention Centre. The design features a sophisticated pairing of contrasting quartz: Caesarstone Turbine Grey for a rich, darker tone, and Arctic from our exclusive Infinite Series for a bright, clean balance.

STONEWORK SHOWCASE

Precision fabrication was key—each desk includes mitered edge lamination for a seamless finish, and a carefully designed ledge running at varying heights. The result? A perfect blend of style and function, enhancing the welcoming experience for guests while showcasing the beauty and versatility of quartz stone.

The mitered stone's two-tiered design offers a perfect balance of style and functionality

We proudly serve monument and memorial clients through our dedicated Memorial Stone subdivision.

MEMORIAL STONE

ADDITIONAL PROJECTS

Crafted for impact, our stonework can be found in major projects throughout the province and extending beyond its borders.

McPhillips Station Casino

Completed an exterior accent feature using Mesabi Black stone in both 2-inch and 3-inch thicknesses.

Canada Life

Supplied 3-inch exterior pavers and 4-inch Laurentian Green stone cladding. This work included replacement exterior pavers, interior tile applications, and exterior Laurentian Green cladding.

True North Square

Produced 1 $\frac{1}{8}$ inch Diamond 300 Mesabi Black stone. Although the stair tread scope was cancelled due to site setup issues, we demonstrated capability in exterior paver production.

Wawanesa Insurance

Fabricated a Cambrian Black stone base for a large commercial outdoor sign located at the front of the building. The base was designed to support and anchor the primary Wawanesa exterior signage.

Additional Projects

McPhillips Station Casino. Exterior work featuring Mesabi Black granite.

The support base for the primary Wawanesa exterior sign in Black Pearl.

ADDITIONAL PROJECTS

Manitoba Legislative Building

Carried out rework on historical stone, including exterior pavers and cladding, with careful colour matching to the existing stone.

Bank of Montreal

For this historical building, we produced 2½ inch stones for exterior cladding and completed historical stone rework to match the original façade.

Best Western Plus Winkler

Supplied and installed stone surfaces throughout the hotel. This included vanities in every guest room and long-term living suite, as well as stonework in the breakfast area, reception desk, communal tables, fitness room, and meeting rooms.

At 225 Vaughn Street and 1800 Leila Avenue

Completed all kitchen countertops and bathroom vanities across both multi-unit apartment buildings, providing consistent finishes throughout the residential spaces.

Super 8 Hotel in Kenora

Completed stonework throughout the cafeteria, contributing to a durable and cohesive interior finish.

Red River Community College

Extensive stonework across multiple program and staff areas. This included staff preparation spaces, low-fidelity and apartment-style training environments, the Paramedicine program areas, and various additional instructional and support spaces throughout the facility.

Additionally, we completed stone work at **Fort Whyte Alive** and produced multiple exterior signage bases and stone signs. This includes Lac du Bonnet welcome-style town signs in 4 inch stone, signage for the Lac du Bonnet trout ponds, and community signs for both Whiteshell Provincial Park and Nopiming Provincial Park in 3 centimetre stone, along with various other exterior signs.
