*Allerton Brewing Company was named after the noble horse who gained recognition in Independence, IA where he set numerous racing records. Independence was referred to as "The Lexington of the North" due to the popularity of the kite-shaped Rush Park race track, which was considered that fastest standardbred track in the world. The Rush Park era (1888-1893) was a very important time in Independence's history, creating significant growth for the town. We will pay tribute to the track, the horse, and the history through our brewery and taproom operations.*
