Green chemistry. *Proven in the field.*

Since 2018, Kationx products have proven their green, best-value proposition. Our customers have achieved compliance, reduced or eliminated fines, and found money in their budgets by cutting both direct and indirect costs.

Infrastructure lasts longer while crews work smarter, not harder. We reduce CAPEX by delivering simplicity, safety and good-quality influent and effluent.

Veteran owned & operated.

Kationx Corp is a veteran owned small business, CAGE 84P00, manufacturing in the USA with a US-only supply chain.

01 Designed green

Non-toxic, non-reactive chemistries: no new molecules, minimal environmental impact, and safety and simplicity first.

02 Ruggedly reliable

Products that perform on demand with immediately observable results and the best value in time and money.

03 Built for real results

Routine use builds a persistent presence, so problems recede. Over time, customers use less for the same results.

A safer, simpler path to lower total operating cost.

Kationx improves crew safety and infrastructure longevity without the complexity of conventional chemical programs.

USA

US-ONLY SUPPLY
CHAIN

KATIONX	CONVENTIONAL ALTERNATIVES
✓ Safe, non-toxic and non-flammable	HAZMAT, toxic, dangerous or reactive
✓ 100% active ingredients	Mostly liquid, often mostly water
✓ Effectively unlimited shelf life	Limited shelf life
✓ Rugged, reliable and all-weather	Sensitive to temperature, pH and sunlight
✓ Lower cost, pound for pound	Higher cost; you may be buying water
✓ Simple to use; no additives	Mixing, measuring, additives and equipment
✓ Field-operator friendly	Third parties, service agreements, complexity
✓ Intuitive training	Certifications, re-certifications, placarding
✓ LA OSP contract listed; buy on demand	Solicitations, bids, evaluations, protests
✓ Made in USA, US-only supply chain	Often imported or only packaged in the US

From the drain to the digester.

One family of non-toxic products covers the whole wastewater journey. Treat problems where they start, keep the collection system flowing, and deliver cleaner influent to the plant.

FOGMVR™

FATS, OILS & GREASE REMOVER

SLURRIES FOG MATS
IN 3-5 MINUTES

CLEARs LINES & MAINS

PREVENTS SSOS
EASIER VAC-TRUCK OUT

COLLECTION SYSTEMS / FOG CONTROL

FOGMVR™

Fats, oils & grease remover

A FOG emulsifier for collection systems. Worked in with jetted water, FOGMVR™ slurries hardened FOG mats in 3-5 minutes, so solids come unstuck and float free. Cleaning and vac-truck jobs go faster, lines and mains stay clear, and sanitary sewer overflows are prevented.

KEY BENEFITS

- ✓ Slurries FOG mats in 3-5 minutes
- ✓ Prevents SSOs; easier vac-truck out
- ✓ Extends equipment & facility life
- ✓ Non-toxic, non-corrosive, skin & eye safe
- ✓ 100% active ingredients
- ✓ Clears lines & mains
- ✓ Keeps cleaning downstream
- ✓ No mopheads; easier solids removal
- ✓ Unlimited shelf life
- ✓ US-only materials. Made in USA.

Weight **25 lbs**

Full pallet \$5,400

BEST FOR

Lift stations & wet wells

Gravity lines & mains

FOG mats & clogs

Spill clean-up

Pairs with ShrinkNFOG™, which eliminates the FOG once it is slurried.

FIXINSEWER™ SOLUTIONS
Lift stations · Lines · Mains · Wet wells

ShrinkNFOG™

BIOLOGICAL FOG ELIMINATOR

EATS FOG
IN PLACE, FAST

KEEPS CLEANING
DOWNSTREAM

ALL-NATURAL
BIOLOGICAL ACTION

PAIRS WITH
FOGMVR™

COLLECTION SYSTEMS / FOG CONTROL

ShrinkNFOG™

Biological FOG eliminator

An all-natural biological treatment that eats and eliminates FOG in place. ShrinkNFOG™ expands by 48+ generations every 24 hours. Once FOG is slurried, the added surface area lets it cut FOG by 50% in just 2–3 days. Treat weekly or bi-weekly to reach and hold a FOG-free system.

KEY BENEFITS

- ✓ Eats FOG in place, fast
- ✓ All-natural biological action
- ✓ Smaller to no FOG mats
- ✓ Easier to vac-out
- ✓ Extends infrastructure lifespan
- ✓ Keeps cleaning downstream
- ✓ Best results applied after jetting
- ✓ Zero FOG = free-floating rags
- ✓ No site prep required
- ✓ US-only materials. Made in USA.

Lift stations · Manholes · Piping

ODR&FOG™

ODOR, H₂S & FOG CONTROL

**REMOVES H₂S
& REACTIVE GASES**

**TREATS AIR
+ WATER PHASE**

**NON-TOXIC
NON-CORROSIVE**

COLLECTION SYSTEMS / ODOR, H₂S & FOG

ODR&FOG™

All-in-one collection system cleaner

Our premium, all-in-one, all-natural sewer treatment. ODR&FOG™ removes H₂S, VOCs and odors, reduces corrosion and slurries FOG. It treats both the air and water phases inside your infrastructure, and keeps scavenging reactive gases as it flows downstream.

KEY BENEFITS

- ✓ Removes H₂S & reactive gases
- ✓ Reduces corrosion
- ✓ Works regardless of chemistry or temp
- ✓ All natural. No synthetics.
- ✓ Non-toxic; no effect on pH
- ✓ Treats air + water phases
- ✓ Slurries FOG mats
- ✓ Cleaner influent reaches the plant
- ✓ 100% active ingredients
- ✓ Unlimited shelf life

BoostR™

H₂S & ODOR ELIMINATOR

**WORKS IN
MINUTES**

**KILLS H₂S
& VOCs**

**NON-TOXIC
NON-CORROSIVE**

COLLECTION SYSTEMS / H₂S & ODOR

BoostR™

Reactive gas scavenger

BoostR™ provides on-demand scavenging of H₂S, VOCs, odors and other dangerous, corrosive, flammable and reactive molecules in both the air and water phases. It works in minutes, taking readings from 198 PPM to 0 H₂S, and builds persistence with regular use.

KEY BENEFITS

- ✓ Works in minutes
- ✓ Corrosion control
- ✓ Operator safe; safe for micro-flora
- ✓ Lowers costs and saves time
- ✓ 100% active ingredients
- ✓ Removes H₂S, CO, VOCs & more
- ✓ Supports confined-space entry
- ✓ Use alone or with ODR&FOG™
- ✓ Unlimited shelf life
- ✓ US-only materials. Made in USA.

PREMIUM / MSRP

per 5-gallon bucket

Package **5-gal bucket**

Weight **25 lbs**

Full pallet **\$6,480**

BEST FOR

Problem wells & lift stations

Manholes before entry

Downstream septic lines

Odor complaints

1 or 2 buckets treat most wells. Drop the bag into the well and shut the hatches so the dust fills the space.

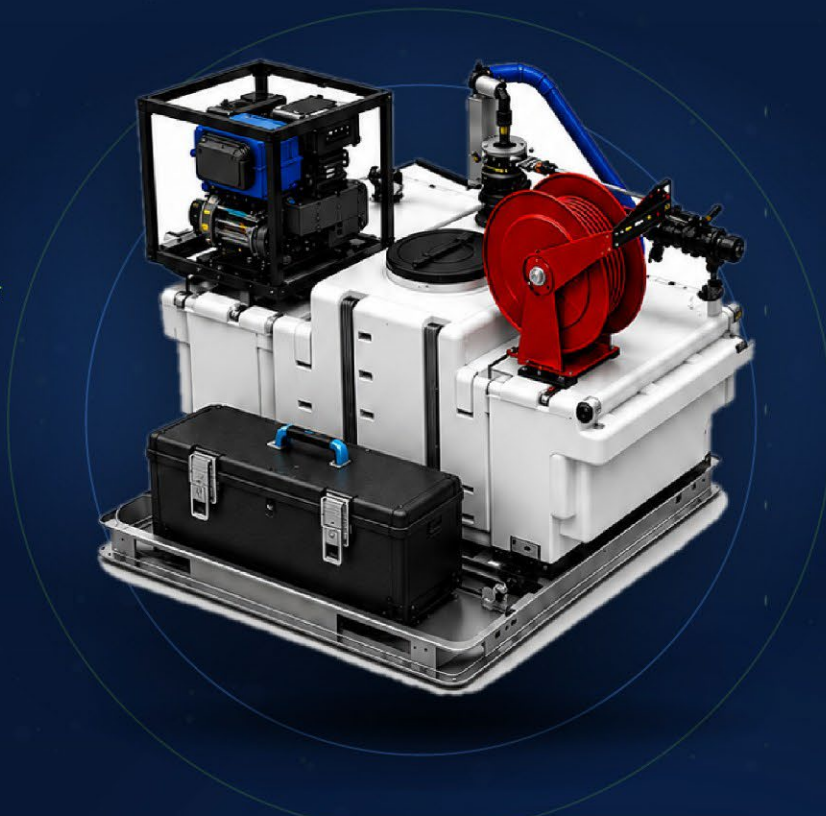

FIXINSEWER™ SOLUTIONS / EQUIPMENT

FOGBSTR™ Jetting Skid

Turn any pickup in your fleet into a jetting unit.

COLLECTION SYSTEMS / EQUIPMENT

FOGBSTR™ Jetting Skid

On-site, on-demand jetting

Give operators jetting capability anywhere, on-site and on demand. The FOGBSTR™ Jetting Skid turns your existing fleet into jetting units, so crews can clean and clear FOG mats the moment they find them while cutting costs and reliance on outside resources.

KEY BENEFITS

- ✓ Jetting capability anywhere
- ✓ Clears FOG mats on the spot
- ✓ Maximizes your team
- ✓ Conforms inside wheel wells
- ✓ Simple & intuitive to operate
- ✓ Any pickup becomes a jetting unit
- ✓ Minimizes costs & outside resources
- ✓ Fits F-150 or larger beds
- ✓ Includes all equipment & tools
- ✓ 200-gal fill; 300 on larger trucks

EQUIPMENT / MSRP

\$22,500

per unit

Empty	680 lbs
Full	3,190 lbs
Fits	F-150 or larger

BEST FOR

Collection system crews

Lift station maintenance

FOG mat response

Pairs with FOGMVR™

Ready to work on delivery, with all equipment, tools and accessories included.

COLLECTION SYSTEMS / EQUIPMENT

FOGBSTR™ Trailer

Turn-key, job-ready jetting trailer

A ready-to-work jetting trailer built around a 325-gallon tank with jetting and recirculating pumps. It lets crews jet Kationx product mixes on large jobs, from master lift stations to bar screens, FOG foam and FOG clog cleanouts.

KEY BENEFITS

- ✓ Jets Kationx product mixes
- ✓ Turn-key, ready-to-work package
- ✓ Jetting + recirculating pumps
- ✓ Dedicated water loading line
- ✓ Hydrant loading
- ✓ Rugged 2-axle build; tows smoothly
- ✓ Two hatches for continuous work
- ✓ Non-skid, ergonomic surfaces
- ✓ Heavy-duty fenders & toolbox
- ✓ Job ready: tools, hoses & fittings

Liquid SETTApHY™

Natural liquid flocculant, by the tote

Replaces liquid alum, ferric and polymer with a natural liquid flocculant for automated dosing to settle biosolids and sludge. It is made in an ISO 9001:2015 plant, and totes are recovered and reused.

KEY BENEFITS

- ✓ Replaces alum, ferric & polymer
- ✓ Clean & clear supernatant
- ✓ Pumps like liquid coagulants
- ✓ Easy Chem-Loc fittings
- ✓ Non-toxic, skin & eye safe
- ✓ 60% settled in 20 minutes
- ✓ Better dewatering & belt pressing
- ✓ No process changes at the plant
- ✓ Won't age out; just resuspend
- ✓ Won't harm plant microecology
