

# Fullstack developer

February, 2024

Hi! We are a cyber security startup based in Berlin called Kalpa and we are looking for a fullstack developer to join our team.

Kalpa's goal is to create B2B cybersecurity posture management software. By merging compliance automation, vulnerability management, and vulnerability disclosure into one system, Kalpa will enable security teams to manage their cybersecurity posture efficiently.

## What we can offer

A flexible, collaborative and success driven environment away from corporate structures and time consuming meetings. Enjoy the freedom to explore and implement your own ideas without micromanagement.

The opportunity to develop a new product that aims to disrupt the current industry.

Equity in the company and the opportunity to join us on the BSS programme (<https://www.science-startups.berlin/programs/berlin-startup-stipendium/>). Through the program you have access to development workshops as well as a monthly grant of 2.200 EUR.

## The role

We are looking for a fullstack developer to join our team. Responsibilities include implementing features into Kalpa's software with the help of internal and external developers.

### What you bring:

- Proficient fullstack developer
- Work independently
- Enjoy a challenge
- Ideally experience in PHP Laravel, Vue.js and MySQL

## Eligibility requirements

If you do not meet the below eligibility requirements we will not be able to provide you with the BSS program or grant. If you still want to work with us please let us know and we will try to accommodate you.

### Criteria:

- You live in Berlin
- You have the right to work in Germany or a valid Visa
- You have not been supported by BSS, EXIST or IBB programs
- You are able to work in our coworking space at the TU 120 hours per month
- You do not own shares in another startup
- You have not been active as managing director in another company for long
- You are not working on other projects for more than 20 hours per month
- You have graduated university
