

## A Celebration of Timber Craftsmanship

Upon entering, the home's magnificent timber structure immediately commands attention. The reclaimed Douglas fir timbers, sourced from three historic factories by Pioneer Millworks in Rochester, New York, were meticulously milled and crafted into a timber frame structure by Hardwick Post and Beam in Massachusetts. The team traveled to Michigan to erect the frame, with Matthew's Construction completing the home. A detailed history of the timbers' origins is available upon request, adding a unique narrative to this architectural masterpiece.
