MISTELLE DE MUSCAT JUVEANO

noble liqueur wine

VÍNO ZE SVAHŮ DEVĚTI ÚDOLÍ

The wine is prepared by a special method of fortification of fermentation must with fine aged distillate. Therefore, in the intense muscat aroma, you can feel elements of primary fruitiness in the form of overripe gooseberries, white peaches and honey, but also secondary aromas, which add complexity to the wine. The roundness of the wine is provided by natural grape sugar, which has been preserved after fermentation stops. You are getting a liqueur wine made using unusually reductive technologies and is therefore unusually fresh for the category of fortified wines.
