MACERATION	2 days
FERMENTATION	Primary fermentation in oak barrel
RIPENING	10 months in oak barrel
MADE BY BOTTLE	1,150 pcs
SERVE AT	10 - 12 °C

About the Variety

Dunaj is an early ripening red hybrid grape variety developed at the Vine Research Institute of Bratislava in 1958 and predominantly found in present day Slovakia, though it is appearing in more Czech vineyards where it is known as **Donau**. It was officially registered in 1997.

Dunaj is a translation of the Slovakian word for the Danube River.

The grape is a cross of St. Laurent (aka Svatovavřinecké in Czechia or Sankt Laurent in Austria), with a hybrid variety derived from a 1951 cross of Muscat Bouchet x Oporto. It is known for its late budding, early ripening, good yields and colour.

Wine Details:
