

CHILLED BEAM

Active, Passive & Multi Service Chilled Beam

ACTILINE Chilled Beam:

- Active linear style for heating and cooling.
- Utilizes primary and induced air through 2-pipe or 4-pipe configuration.
- Adjustable nozzle for flexible airflow.
- Extravents for significant adjustments to primary air quantity.
- Perforated grille opening for optimum heat transfer.
- Available in standard sizes: 24" and 12" width, various lengths.

Passicon Chilled Beam:

- Passive linear design for quiet operation.
- Operates on natural convection principle.
- Eliminates need for external primary air through AHUs.
- Same sizes available as ACTILINE.
- Ideal for spaces with limited primary air access or low ceilings.

Versiflow Chilled Beam:

- Multi-purpose solution with active linear design.
- Integrated LED lighting.
- Reduces installed components for streamlined design.
- Enhances visual appeal of projects.
- Available in two sizes: 24" by 48" and 24" by 60".
