

Hydrogen Fuel Cell Vehicles

A Trip Along the Hydrogen Highway

September 2025 - Join Us!

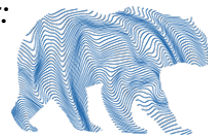

From Water to Water, A Trip on the Hydrogen Highway

The Association will take a trip next September, visiting parts of CA, OR, WA and BC to bring attention to the progress that has been made with the availability of H_2 fueling infrastructure, but also to highlight those areas where there are gaps yet to be filled. It is our hope that the attention will help not only light-duty FCEVs, but medium and heavy-duty FCEVs as well.

A Note of Support from the Governor's Office of Economic and Business Development

"We wish the California Hydrogen Car Owners Association great success in their upcoming tour, "From Water, to Water: A Trip along the Hydrogen Highway". The group will travel on the Hydrogen Highway (I-5) from California to British Columbia in order to further highlight the important role that clean, renewable hydrogen can play in the State's, and in the Nation's, energy future."
