Challenge the laws of time with

INFINITY

FUTURE |N|G|E| TECHNOLOGY

NEUROCOSMETICS

The skin is connected to the NERVOUS SYSTEM from the start, as they are both created in the same embryonic layer. It has an infinity of nerve endings that send signals to the brain via neurotransmitters, to which the brain responds. NEUROCOSMETICS acts on the nervous system, counterbalancing negative stimuli to prevent the appearance of all signs of aging.

GENOMICS COSMETICS

Genetic information (DNA) determines how our skin ages, but as time passes, by and due to external factors, this information becomes damaged, accelerating the appearance of the signs of aging.

GENOMICS COSMETICS protects the DNA and prevents those damages, keeping the skin younger for longer.

EPIGENETICS COSMETICS

Epigenetics has proven that the action of our genes is closely linked to the appearance of our skin, as the activation and regulation of processes key to keeping it in perfect condition depend on it. For this reason, EPIGENETIC COSMETICS act on the genes to make them work like they do in young skin, prolonging its youth.
