## WHY DOES OUR SKIN AGE?

The skin and the **nervous system** are connected from the start, since they formed in the same embryonic layer.

The latest scientific advances show that due to this connection, the aging process depends, to a great extent, on how our brain reacts to the stimuli it receives.

In addition, the information that DNA contains (**genomics**), how genes act (**epigenetics**) and the biological rhythms of our body—such as the sleep/wake cycle (**circadian rhythms**)—are key to getting younger-looking skin.

The CASPARA Research Center has fused together, in a collection of intelligent cosmetics with *ultra-rejuvenating* action, all the latest medical-scientific advances—acting directly on DNA (**genomics**), the expression of genes (**epigenetics**), the nervous system (**neurocosmetics**) and circadian rhythms (**chrono-cosmetics**).

## INFINITY TREATMENT

### YOUTH ACTIVATOR with:

#### GENOMIC ANTI-AGING ACTION

ETERNAL BEAUTY

- Delays aging.
