Alginate

Solum diatomeae, Algin, Calcium sulfate, Tetrasodium pyrophosphate

USE: Pour the activator into the container with alginate and mix until you obtain a smooth mixture with no lumps. Apply the mask to face and leave on for about 10 minutes until completely dry. Gently remove the mask starting from the bottom.

FUNCTIONAL SUBSTANCES

BITTER ORANGE FLOWER WATER: restoring and revitalizing.

PANTHENOL: it is converted into pantothenic acid in the skin and has strong moisturizing, soothing, restructuring and energizing effects. It promotes the energy metabolism of skin cells and their optimum nutrition. Thanks to its soothing action, it is featured in emollient products, because it reduces both erythema and dermatitis.

ELASTIN: it has film-forming properties and

moisturizing action. It's very rich in amino acids and provides a significant increase in skin hydration, elasticity and turgor.

HYALURONIC ACID: with excellent moisturizing properties, against dry skin and cracking. It is featured into the dermis, where it binds many water molecules, ensuring turgor and proper hydration. After application to the skin, it creates a macromolecular layer on the stratum corneum which reduces TEWL, thus keeping the skin moisturized.

CICLODEXTRIN: extraordinary oligosaccharide of plant origin with tightening and elasticizing effects. It has moisturizing properties like sugars and creates a fine, supple and resistant film on the skin, smoothing out wrinkles. It smooths skin ridges, making the skin soft and bright.

PEPTIDES: they reduce and prevent fine lines

PRODUCT INFORMATION SHEET

and signs due to micro-contractions of the skin. They smooth the skin and reduce wrinkles and micro-ridges. Peptides facilitate new collagen production, strengthening and re-

densifying tissues.

CERAMIDES: they are used in cosmetics in order to restore and keep skin barrier integrity. They have excellent moisturizing action.

WARNINGS:

- Keep out of reach of children.
- Keep away from heat and direct sunlight.
- Avoid direct contact with eyes.
- Do not disperse the container into the environment.

STORAGE

Optimum conditions: store the product in well-ventilated and dry place, away from light and heat sources, at temperatures between 15 °C and 25 °C.

TRANSPORT

Optimum conditions: the product should be carried at temperatures between 15 °C and 25 °C, away from light and heat sources.

Special provisions: the product is not classified as dangerous. Therefore, transport does not have to follow the provisions of ADR (road), RID (rail), IMO (sea), ICAO / IATA (air).

(For cosmetic products that can be classified as dangerous - e.g. flammable perfumes, aerosol products, hair dye products, hair removal products, etc. - transport must be carried out by authorized companies, in accordance with ADR / RID / IMO / ICAO / IATA provisions. In these cases, the product must be transported in suitable containers of compatible material. The staff must also be trained at a level matching their duties and responsibilities in accordance with regulations relating to the transport of dangerous goods.)

ACCIDENTAL CONTACT OR MISUSE MEASURES

Eye contact: in case of accidental contact, rinse with plenty of water. If eye irritation persists, seek medical advice

Ingestion: in case of ingestion of excessive amounts of product, seek medical advice.

DISPOSAL CONSIDERATIONS

Empty containers may be disposed of after use in accordance with the labelled instructions.

OTHER INFORMATION

The information and instructions above are based on our knowledge at the time of preparation of this sheet.
