

GENERAL INFORMATION

Product description: fluid emulsion

Manufacturer: PDT Cosmetici s.r.l. viale Cavalieri del Lavoro, 45-47 70017 - Putignano (BA)

Telephone number: T. +39 080 4931509

Ingredients: Aqua [Water], Caprylic/capric triglyceride, Glycerin, Aloe barbadensis leaf juice, Glycyrrhetinic acid, Glycyrrhiza glabra root extract [Glycyrrhiza glabra (Licorice) root extract], Borago officinalis seed oil, Lecithin, Tocopheryl acetate, Calendula officinalis flower extract (*), Tocopherol, Helianthus annuus seed oil [Helianthus annuus (Sunflower) seed oil], Ascorbyl palmitate, Phenethyl alcohol, 1,2-Hexanediol, Acrylates/C10-30 alkyl acrylate crosspolymer, Caprylyl glycol, Xanthan gum, Tetrasodium glutamate diacetate, Sodium hydroxide, Citric acid, Sodium benzoate, Potassium sorbate. *organic

USE: apply the product to the areas to be treated and gently pat until completely absorbed.

FUNCTIONAL SUBSTANCES

LIQUORICE EXTRACT: it reduces redness and has soothing action with whitening effects on skin areas with hyper-pigmentation, because it limits melanin production. It is therefore effective in the treatment of skin spots and in soothing the effects of sunburn. Its cicatrizing effects that make it suitable for treating acne and pimples are also known. Recent studies have shown that it is very useful for fighting wrinkles, in particular those caused by photo-aging following excessive exposure to sunlight.

BORAGE SEED OIL: this oil is very rich in Omega-6 polyunsaturated fatty acids extracted from borage seeds with first cold pressing. It also contains a large amount of important minerals including calcium, potassium and tannins. All of these compounds work as precursors to the phospholipids that make up cell membranes. Borage seed oil is used for all skin problems. It

is an excellent ally in cosmetics as it counteracts skin aging and has regenerating action on dry skin, while counteracting skin inflammation.

18-B-GLYCYRRHETINIC ACID: pentacyclic triterpenoid acid is obtained from the liquorice plant (Glycyrrhiza glabra). Thanks to its properties, it is used in cosmetics for sensitive and delicate skin, and is effective as soothing agent in products for children, aftershave and after-sun products, products for inflamed skin prone to redness, atopic and seborrheic dermatitis and irritation.

TOCOPHEROL: Vitamin E and its esters have excellent antioxidant effects, because they are able to attenuate the reactivity of free radicals, thus blocking the cascade of events which cause oxidative stress damaging cells.

CALENDULA OFFICINALIS: rich in triterpenes, flavonoids, polysaccharides, carotenes and phytosterols, it has excellent soothing properties. Flavonoids have antiphlogistic effects on sensitive skin and inflammation, stimulate reepithelialization, accelerate epidermal turnover and promote the dermal fibroblast activity while

facilitating collagen synthesis.

ALOE VERA GEL: it contains polysaccharides with D-glucose and D-mannose, phytosterols, vitamins, enzymes, trace elements and amino acids. Aloe juice basically moisturizes and

soothes the skin. Its gel creates a protective film on the skin enabling its moisturizing action. Aloe reduces skin redness and has soothing and cicatrizing properties.

WARNINGS

- Keep out of reach of children.
- Keep away from heat and direct sunlight.
- Avoid direct contact with eyes and mucous membranes.
- Close the container after use.

STORAGE

Optimum conditions: store the product in well-ventilated and dry place, away from light and heat sources, at temperatures between 15 °C and 25 °C.

TRANSPORT

Optimum conditions: the product should be carried at temperatures between 15 °C and 25 °C, away from light and heat sources.

Special provisions: the product is not classified as dangerous. Therefore, transport does not have to follow the provisions of ADR (road), RID (rail), IMO (sea), ICAO / IATA (air).

(For cosmetic products that can be classified as dangerous - e.g. flammable perfumes, aerosol products, hair dye products, hair removal products, etc. - transport must be carried out by authorized companies, in accordance with ADR / RID / IMO / ICAO / IATA provisions. In these cases, the product must be transported in suitable containers of compatible material. The staff must also be trained at a level matching their duties and responsibilities in accordance with regulations relating to the transport of dangerous goods.)

ACCIDENTAL CONTACT OR MISUSE MEASURES

Eye contact: in case of accidental contact, rinse with plenty of water. If eye irritation persists, seek medical advice.

Ingestion: in case of ingestion of excessive amounts of product, seek medical advice.

DISPOSAL CONSIDERATIONS

Empty containers may be disposed of after use in accordance with the labelled instructions.

OTHER INFORMATION

Unless otherwise specified, the list of ingredients is not intended to be definitive for the preparation of the label.

The information and instructions above are based on our knowledge at the time of preparation of this sheet.
