- Age between 30 and 60 years
- Dehydration conditions on all subjects
- Control vs placebo
- T = 30gg-60gg

#### RESTRUCTURING AND REDENSIFYING ACTION

## A PERSONALIZED TREATMENT PLAN IN 4 STAGES

ELEMENTS SYSTEM allows the physician to **safely manage a personalized treatment plan in 4 stages,** which can smooth and enrich the skin, giving an even, youthful and luminous appearance.

STEP O

PREPARATORY TREATMENT

The pre-peeling product should be applied at the beginning of each session to stabilize the skin pH in preparation for the functional treatment.

STEP 1

FUNCTIONAL TREATMENT

Apply the **primary peeling** to actively treat the main beauty issue requiring attention.

STEP 2

SYNERGIC TREATMENT

Apply the synergic treatment by combining it with the active ingredients of the functional treatment in order to to amplify the results of step 1 and step 2.

STEP 3

RESTORATIVE TREATMENT

**Regenerating, moisturizing** and illuminating product for daily home application, which ensures immediate post-treatment recovery.

## A PERSONALIZED TREATMENT PLAN IN 4 STAGES
