COMPANY OVERVIEW

SANCIAN is an AI governance consultancy for federal health. We help agencies implement AI that reduces clinician burden and supports human capacity. Our frameworks bridge the gap between AI potential and implementation reality.

Predict. Protect. Empower.
Guiding public health leadership through clarity, equity, and AI-powered insight.

CORE COMPETENCIES

AI & Data Innovation for Public Health
SANCIAN develops equitable AI models that support disease surveillance, outbreak prediction, and workforce planning, and we build interactive dashboards and predictive analytics tools to empower real-time, evidence-based decision-making.

- Designing and implementing AI Readiness Assessments and 90-Day Pilot Programs for federal health agencies.
- Developing equitable AI models for disease surveillance, outbreak prediction, and workforce planning.
- Building interactive dashboards and predictive analytics to empower real-time, evidence-based decision-making.

Regulatory Science & Policy Integration
SANCIAN experts advise federal leaders on science policy design to align emerging technologies with the public interest, while supporting compliance and risk assessment to strengthen oversight across agencies

- Advancing regulatory science tools, standards, and frameworks to evaluate health technologies for safety, efficacy, and quality.
- Advising federal leaders on science policy design, aligning emerging technologies with public interest mandates.
- Supporting compliance and risk assessment to strengthen FDA/HHS oversight of innovative products.

Equity-Driven Strategic Consulting
SANCIAN conduct stakeholder mapping and engagement strategies to ensure inclusivity in decision-making, and we facilitate policy analysis and program evaluation with a focus on underserved and diverse populations.

- Embedding equity and ethics frameworks into federal AI and health policy initiatives.
- Conducting stakeholder mapping and engagement strategies to ensure inclusivity in decision-making.
- Facilitating policy analysis and program evaluation with a focus on underserved and diverse populations.

Science Communications & Workforce Development
SANCIAN designs training programs, workshops, and executive briefings on AI and regulatory readiness for federal teams, while driving leadership development for public health professionals navigating technological transformation.

- Transforming complex scientific data into clear, actionable communications for policymakers, providers, and the public.
- Designing training programs, workshops, and executive briefings on AI and regulatory readiness for federal teams.
- Driving leadership development for public health professionals navigating technology transformation.

Predict. Protect. Empower.
Guiding public health leadership through clarity, equity, and AI-powered insight.

Program Evaluation & Strategic Planning

SANCIAN supports program evaluation and strategic planning by delivering comprehensive assessments of program effectiveness, efficiency, and equity, ensuring long-term resilience, innovation, and alignment with HHS's mission.

- Delivering end-to-end program assessments for effectiveness, efficiency, and equity.
- Supporting federal agencies with strategic roadmaps, governance models, and sustainability plans.
- Providing consultative partnerships that align with HHS's long-term vision of innovation, resilience, and equity.

KEY DIFFERENTIATORS

AI Strategy & Readiness
Preparing agencies to adopt AI ethically, efficiently, and equitably.

Predictive Modeling & Surveillance
Harnessing machine learning to anticipate disease dynamics.

Equity-Driven Health Policy & Stakeholder Mapping
Integrating equity frameworks into AI-powered policies.

Data Intelligence & Visualization
Turning complex health data into intuitive dashboards.

Regulatory Science and Innovation Tools
Developing standards to assess safety, efficacy, and quality.

GOVERNING PRINCIPLES

- Governance-first adoption
- Readiness before reimbursement
- Payment aligned to burden reduction
- Implementation science over model development
- Human capacity as a success metric
