SECOND EDITION

OUR STORY

Welcome to Zenna Professional, the new name for American Pride.

American Pride is now Zenna Professional. While our name is new, our focus on serving the unique needs of bath industry professionals is unchanged.

Since 1984, we've been providing industry-leading bath products and service to builders, architects, designers and commercial and home renovators.

We started American Pride, a manufacturer of plastic body medicine cabinets, in Greenville, South Carolina. In 2000, American Pride was acquired by Zenith Home Corporation (now Mayzon) and relocated to a larger facility in the Blue Ridge Mountains of North Carolina. Today, our production and distribution are based in our modern manufacturing facility in New Castle, Delaware.

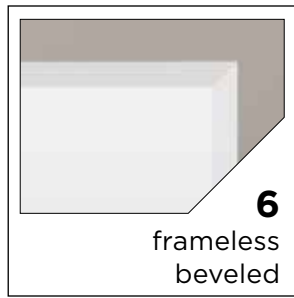

We are a market-leading manufacturer of commercial-grade semi-custom medicine cabinets and decorative framed mirrors. We also offer premium aluminum medicine cabinets, bath furniture, professional-grade shower rods, bath accessories, bath safety products and vanities.

To learn about the other great brands and product lines in our Mayzon family of businesses serving bath and home needs, check out zennahome.com (bath and home products for consumers), zennahospitality.com (bath and room products for the hospitality industry) and our newest acquisition, rgihome.com (baskets and other home storage). To learn more about our overall organization, go to mayzon.com.

MIRROR OVERLAY KITS

A small upgrade can make a big impression and choosing a mirror frame kit adds style and refinement to your property. We make it easy, by stocking frame kits that match many of the most common mirror sizes. Frame kits come in 4 finish options, so we are sure to have what you need to complete the job effortlessly!

UPDATING MADE EASY

— Just follow these 4 quick steps:

1. Low profile clips are included in the kit. Replace existing mirror clips as needed.
2. Apply a small amount of wood glue to the frame joints.
3. Insert bowtie connectors into frame joints to assemble the corners.
4. Remove tape backing strips and adhere to the mirror.

For more permanent adhesion, apply polyurethane (not included) in between the tape strips prior to mirror installation.

GRAB BARS

Placement recommendations

1. Inside shower or tub — reduce the risk of falling in the tub or shower
2. Outside of shower or tub — help steady yourself while getting into and out of the tub
3. Next to the toilet — assist in safely lowering and raising yourself from a seated position
