

Our Story

As parents and grandparents who love and care for children, we find our conversations around the table sooner or later finding their way to the topic of education. There have always been stories to tell, classrooms to compare and memories of our favorite teachers. It is the wonderful adventure of education that sets our course, allows us to find our path and be successful in our lives. Those conversations are how ideas begin to grow and develop. Peninsular Academy is a result of those conversations. We are people who love and care about children as they embark on their educational journey to ensure that it is a meaningful experience. Peninsular Academy is a 501 (c)(3) nonprofit Montessori that is committed to helping children maintain their curiosity about learning, to find their path and be successful. We would enjoy having your company along the way.
