As per the discussion and proposal distributed by Jai Uppal in the board chat on Friday April 12th.

Motion that we add the discount cards to the registration for the price of \$50 (each card bought at \$10 - total of five per player) to be sold at the price of \$15 dollars.

Price break down will be

\$3 - cost to produce by the company

\$7 - rebate back to the club

\$5 - rebate back to the teams.

The card will show the price \$15 dollars.

Each competitive player will receive 5 cards. The club will be invoiced \$3/card by the supplier which is expected to cost approximately \$11,550 (770 players x \$3/card x 5 cards/player). The club will keep the revenue generated by the additional registration fee of \$50/player (770 players x \$50 each = \$38,500) in revenue. No money is expected to be returned to the club when players sell their cards for \$15 each. This money can be used to offset their own registration fees or paying team expenses.

Made by Jai Uppal, seconded by Scott Millsap.
