AI Training Bootcamp

UCResolution

HAS AI TAKEN OVER? YES.

DOES IT HAVE TO BE SCARY? NO!

Is This Bootcamp Right For You?
If any of the following sounds familiar, you are exactly who this bootcamp is designed for:
- Your team is experimenting with AI tools like ChatGPT but lacks a consistent approach.
- You are curious about AI but unsure how to extract real value for your business.
- You have tried a few AI initiatives, but nothing has truly scaled or stuck.
- You want your whole team aligned, confident, and productive with AI tools.
- You are ready to move from isolated experiments to repeatable, scalable workflows

What You'll Get in This 2-Hour Workshop
•**Clear, Non-Technical Introduction to AI:**
Understand how AI actually fits into your business operations — no jargon, no tech overwhelm.
•**Ready-to-Use Prompt Frameworks:**
Instantly usable templates for Marketing, Sales, Operations, and Internal Teamwork — so your team can start working smarter right away.
•**Team Prompt Library:**
Build a shared, evolving library of your company's most effective prompts, workflows, and best practices.
•**Framework for Teamwide AI Adoption:**
Learn proven systems to align your people, create repeatable workflows, and scale AI usage across departments.
•**Real-Time Practice and Actionable Tools:**
Hands-on exercises during the workshop — plus practical tools you'll take back and use immediately.
•**AI Security and Safety Awareness:**
Equip your employees with essential best practices for using AI securely — protecting your company's data, IP, and workflows while maximizing productivity.

Why This Matters
AI is no longer optional. Businesses that adopt AI smartly are gaining clear competitive advantages. This bootcamp is designed to help your team skip confusion and build real momentum without the overwhelm.
