

## Proud lens partner

Pentrieth Spectacles is partnered with ZEISS to provide only the best quality lenses in our glasses. Each ZEISS lens is the result of over 175 years of experience, research and innovation in optics.

### Sunglass level UV protection in clear ZEISS lenses.

UV rays are harmful to our long term eye health, even on cloudy days. That's why ZEISS has created a new standard of eye care - ZEISS UVProtect.

### ZEISS BluePro - More protection, less reflection.

Our lives are becoming more and more digital. We work, play, learn, and shop online, wherever we are. With this lifestyle change, we rely on our eyes more than ever before. This means that, besides the potentially harmful blue light exposure from the sun, we're also more vulnerable to artificial blue light.

Protect your eyes from the challenges of the new normal with ZEISS BluePro Lenses. It's designed to address digital eye strain, without annoying blue-purple reflections.

## ZEISS SmartLife Lenses

We live in a fast-paced world, constantly connected to people and information, both on - and offline. Our eyes are glued to digital devices even when we are on the move. This fast-paced lifestyle often leads to eye strain.

See clearly and experience sharp vision all day long with ZEISS SmartLife Lenses. Wide fields of view across all distances and in all directions can improve your clarity of vision - no matter your age.

#### All ZEISS SmartLife Lenses feature:

All day visual comfort for your connected and on-the-move lifestyle.

Optimised near zone for better reading on digital devices.

Takes your age-related pupil diameter into account.

Full UV protection upto 400nm - the same level as premium sunglasses.

Don't settle for standard.

### Choose ZEISS ClearView Single Vision Lenses

Don't compromise when it comes to your vision. ZEISS ClearView Single Vision Lenses offer excellent vision clarity from the lens centre to the periphery, in a lens that is flatter, thinner, and more attractive-looking than conventional lenses.

### ZEISS PhotoFusion X Lenses

Our new range of photochromic lenses, ZEISS PhotoFusion X, is extremely light reactive. This means that it goes from clear to dark and back fast, making it suitable for all light conditions.

**ZEISS PhotoFusion X clears up to 2.5 x faster indoors.**

**Outdoors, ZEISS PhotoFusion X tints to sunglass-level darkness in seconds.**

**ZEISS PhotoFusion X provides the highest blue light protection.**
