

AMMO CAN AUDIO

SKIN

BATTLE TRANNY

Welcome to the latest from Ammo Can Audio

Our new case is an exciting extension of the Combat Wombat series. Our new Battle Tranny has also been created in a genuine M2A1 Ammo can, but the difference is, the Battle Tranny is a SKIN.

The 18 volt Batteries from either Ozito, Makita, DeWALT or Milwaukee will fit in your Battle Tranny. Simply lift the lid and click in your Battery. The output is an awesome 50 watts per channel.

You gunna Luv this!

SKIN

•To Play

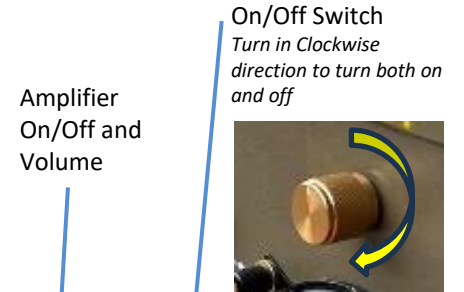

- Turn **UNIT ON** by rotating knob in a clockwise direction. To turn off do the same, rotate knob in clockwise direction.
- Connect Phone, Tablet or compatible audio player via Bluetooth, look for ZZ-100
- Adjust audio levels with your Input device (phone) or on Amplifier
- When not in use. Turn UNIT ON/Off switch OFF.

• When to Recharge

Your unit is engineered for extended use, offering up to **40 hours of runtime** on a single charge. The system is equipped with a **low voltage cut-off** feature to protect your battery from damage.

- Automatic Power Down:** The unit will automatically power down when the battery level reaches approximately **14.5 volts**. This is a built-in protection mechanism and indicates that the battery needs to be **recharged or replaced**.
- Battery Meter Guidance:** You can monitor your battery level using the status meter. Expect shutdown to occur around the **14-volt mark**.
- Compatibility Note:** If you are using **Ozito batteries**, be aware they also include a similar low voltage cut-off feature.

To resume operation after shutdown, simply **recharge or replace** the battery.

Bluetooth Connectivity

- Turn unit and amplifier on, open Bluetooth connections on your device. Look for ZZ-100 and press connect. Once you have made a connection, you will be able to change the Bluetooth name of your box, to anything you wish, simply follow the prompts.
- Each unit comes with a Bluetooth extender aerial. It is recommended that you use this to enhance your connectivity.

TROUBLESHOOTING

BLUETOOTH

- Bluetooth can be paired with many devices, yet only connected to 1 device at a time. Bluetooth will also connect automatically with a paired device within range. Always remember that if you cannot connect to your unit, there is a good chance it is connected to another device. Turn Bluetooth off on that device and try again.
- To listen to the radio on your Battle Tranny we suggest 1 of the many apps available both on iTunes and the Play store or 1 of the many stations that have their own app (ABC 3AW etc).
