

## **Congestive Heart Failure Clinic**

Open Monday - Friday 8:00 am - 4:30 pm

Congestive heart failure (CHF) is one of the most common reasons people are admitted to the hospital. The goal of our CHF Clinic is to partner with you to provide the treatment, education and support you need to improve your quality of life and prevent repeated hospitalizations. The more you understand about your disease, the better we can work together to improve your condition.

We work closely with your cardiologist, to ensure you are on the appropriate medications, as well as your electrophysiologist, for consideration of device therapy. Initial visits are scheduled to ensure that you are closely monitored and that all of your questions are answered.
