

## SeatSmart SLT Overview

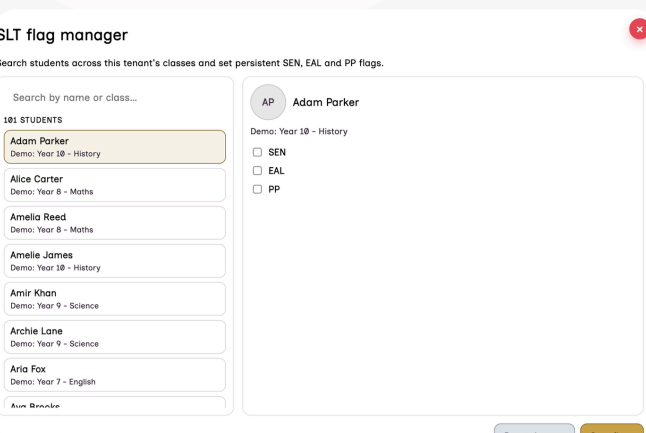

SeatSmart helps teachers create behaviour-supporting seating plans quickly and consistently across a school. Most schools begin with a small pilot and expand within a term. If you need help, email [support@seatsmart.co.uk](mailto:support@seatsmart.co.uk) and we'd be happy to help.

### 1. Why Schools Use SeatSmart

SeatSmart helps schools:

- Reduce low-level disruption
- Support behaviour strategies consistently
- Share seating plans with cover staff
- Adjust groupings quickly after assessments
- Save teacher planning time
- No extra data entry is required when using Teams or Google Classroom.

Seating plans become easier to update and more consistent across departments.

### 2. What SLT Can See

SLT can view:

- Saved seating plans
- Updates made over time
- Printable plans for cover staff

This can support behaviour reviews and demonstrate structured classroom organisation.

There is also an SLT flag manager where you can centrally set key student information.

### 3. Suggested Rollout Plan

Most schools follow this approach:

#### Week 1-2

Pilot with 3-5 teachers in different departments.

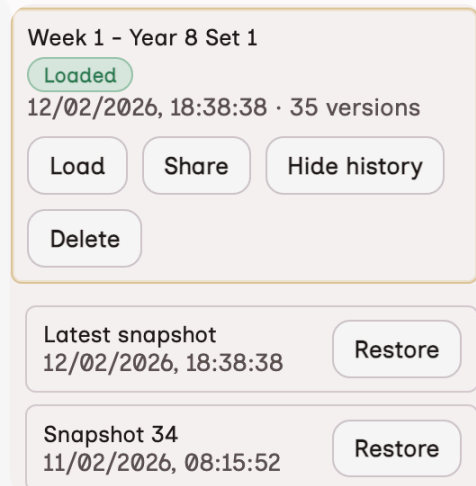

#### Week 3-4

Share examples at staff meeting.

#### Half term

Offer optional training and expand rollout. This keeps workload low and builds confidence.

**Tip:** Start with teachers who are open to trying new tools.

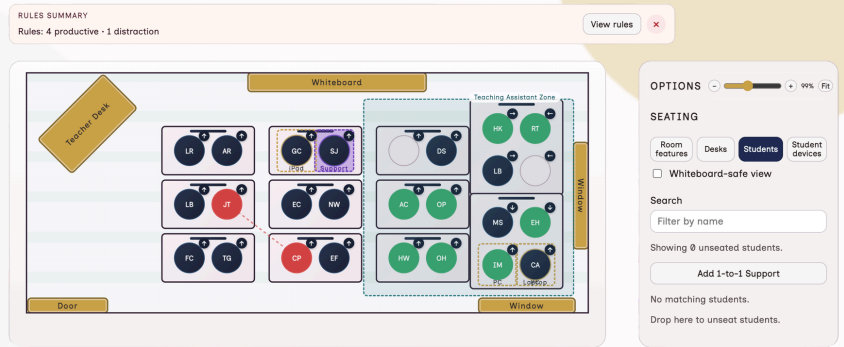

#### 4. Supporting Behaviour Strategies

SeatSmart allows teachers to:

- Separate pupils where needed
- Prioritise support needs
- Create collaborative groupings
- Save different layouts for different lesson types

Plans can be updated quickly as needs change.

Conflicts:

**Distraction minimisation violated: Charlie Patel & Jack Turner**

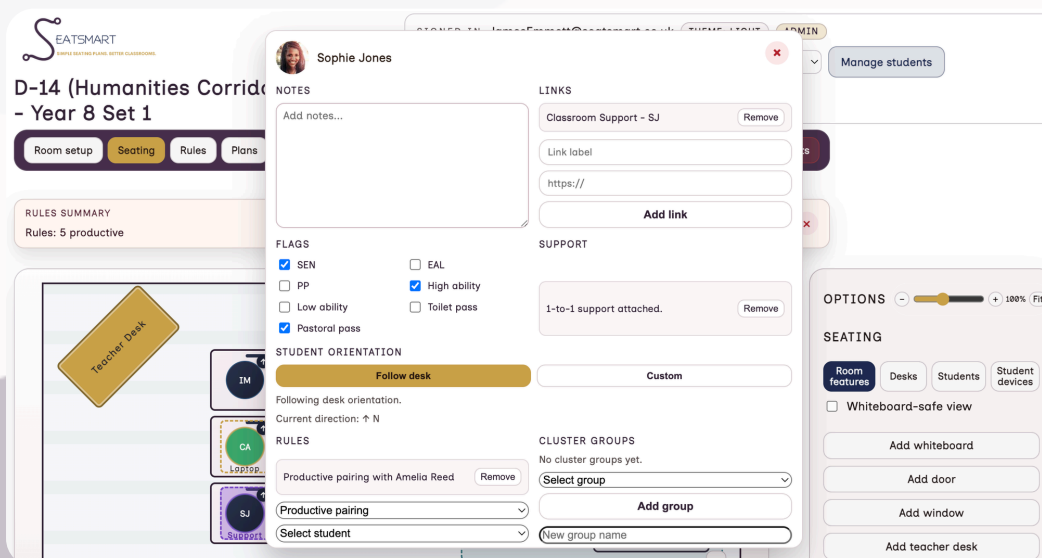

#### 5. Ofsted Inspection Readiness

Inspectors often look for evidence of structured classroom organisation and responsive behaviour strategies.

SeatSmart helps schools show:

- Clear seating plans
- Regular updates
- Consistent expectations
- Easy sharing with cover staff

This supports behaviour and safeguarding evidence.
