

Teacher - Welcome to SeatSmart

SeatSmart helps you create behaviour-supporting seating plans in minutes. Most schools are set up in around 15 minutes. If you need help email support@seatsmart.co.uk and we'd be happy to help.

1. Login

Go to: app.seatsmart.co.uk

Use your school email (either Microsoft or Google) to login.

CLASS ROSTER Demo: Year 8 - Maths Manage students

Custom class roster

Web app only. CSV imports merge by className + studentId. If studentId is blank, SeatSmart auto-generates one.

Display name

Email (optional)

Flags (optional)

Notes (optional)

Add student

CLASS	NAME	STUDENT ID	EMAIL	ACTIONS
No custom students yet.				

3. Create your first seating plan

Choose a room layout, then drag and drop your features onto it, like your whiteboard, student desks, and entry points.

Add any extra notes, flags, or rules to your students for productive pairings or to minimise disruption.

Click Generate Plan and SeatSmart will create a balanced seating plan instantly.

You can drag students to adjust placements if needed.

Tip: Start with one class first, most teachers are up and running in under 15 minutes.

You'll now have a printable seating plan ready to use.

Sign in with Microsoft

Sign in with Google

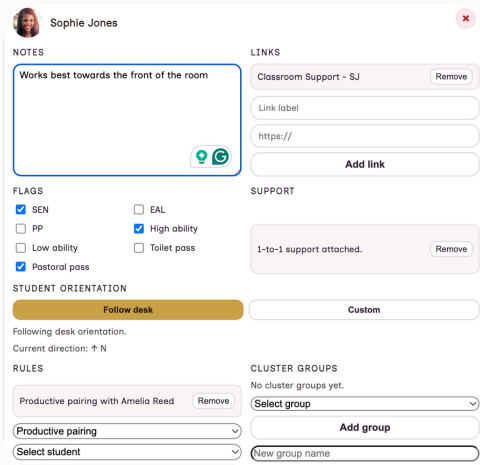

2. Set up your classes

If your school uses Microsoft Teams or Google Classroom, your classes will import automatically.

Alternatively, manual upload (CSV or simple entry) works well for smaller settings.

Tip: You only need names to start, extra info can be added later.

Student data can be removed at any time by your school admin.

4. Share, Save, or Print

You can:

- Print a teacher copy
- Use Whiteboard View to help students find seats
- Share with colleagues or cover teachers

Multiple plans can be saved for one class, for example project work or different lesson styles.

5. Update Plans Easily

Seating plans can be updated any time.

Common reasons to update:

- Behaviour concerns
- New topic groupings
- New students
- After assessments

Just adjust rules and regenerate.
