Dear MN Aviation Hall of Fame,

It is with great pleasure that I nominate John Sandberg to the MN Aviation Hall of Fame. He was born in Minnesota and had his own engine shop in Plymouth, MN. His work brought him to manufacturing parts for the moon landing, rebuilt and restored engines of legendary warbirds, and was a key player in building the Tsunami, which broke records in air racing.

Though I did not know him personally, his legacy lives on the Experimental Aircraft Association (EAA). Through his death, he ensured that he would be able to support the aviation community through setting up an endowed scholarship fund. Since 2019, he has already provided scholarships to 6 students to pursue their A&P certifications. His endowed scholarship will live on for many years to come, supporting countless students in their pursuit of making their own contributions to the aviation community.

Please consider inducting John Sandberg into the MN Aviation Hall of Fame. John continues to be a role model and source of inspiration for our future generations. His passion and determination encourage current and future generations to strive for excellence, pursue their passions, and make positive contributions to the aviation community.

Sincerely,

Rebecca Greskoviak
