

# M105 : Protect

barrier cream

### Description of product

Protect is a quick drying, non-tainting barrier cream that offers its full protection in 30 seconds.

### Product Uses

Helps prevent dermatitis, is pH neutral and includes conditioners to prevent skin dryness and irritation. Use as a preventative measure to help against the effects of solvents, paints, powders, acids etc.

### Directions

Apply a pea sized amount to clean DRY hands and rub in well, paying particular attention to sensitive areas e.g. around finger nails, broken skin, between fingers etc. The product should rub dry and become waterproof within 30 seconds. If the product is over applied, skin will be sticky but the excess can be wiped off. Too little cream always offers more protection than a thick film which cannot dry. NOTE: the regular use of a barrier cream is not a substitute for the safe handling of hazardous materials and chemicals.

**iN Insight Supported**

iN Insight is Selden's interactive product selection and training system. Enables the user to create full COSHH training kits, wallcharts, task cards and more. visit <http://www.selden.co.uk/insight>
