

Evershine Roofcare

Professional Roof Cleaning & Protection

Our Process

Every project begins with careful planning and attention to detail. Once your deposit is secured, we include a complimentary drone inspection to provide a full before-and-after record of your roof's transformation.

Our trained team sets up safe alloy access towers, allowing us to foam, clean, and rinse your roof without ever stepping on your tiles. After a gentle soft wash to remove moss, lichen, and grime, we allow the surface to dry naturally before applying long-lasting biocide formula. This treatment prevents the possibility of any further growth for 24 months.

Sealing

Our professional roof sealing service is an optional upgrade available after cleaning. The protective coating provides up to 5 years of lasting protection, keeping your roof cleaner for longer and reducing future maintenance.

Because sealing requires dry conditions, it's a seasonal service — if the weather isn't suitable on the day of cleaning, we'll schedule a return visit once conditions are right. You'll only be charged for the sealing work once it's been completed to our usual high standard.

Pricing and Timescale

The cost of roof cleaning varies depending on the size, shape, and condition of your roof. To give you complete transparency, we carry out a free, no-obligation survey before any work begins and provide a detailed written quotation. There is absolutely no pressure to proceed unless you are completely satisfied with the price and our proposal. We pride ourselves on offering the most competitive prices in Kent without ever compromising on quality. Our efficient process and honest approach mean you'll always get exceptional value for money — often beating like-for-like quotes from other reputable companies

For most residential properties, the full process — including cleaning, treatment, drying, and sealing — typically takes around half a day. Larger or more complex roofs may require additional time, but we always provide an accurate schedule before starting.

Suitable Properties

Evershine Roofcare can clean and treat almost any type of property, including detached, semi-detached, and terraced homes. For semi-detached properties, we clean and seal up to the boundary line where your neighbour's roof begins. If your neighbour would also like their roof cleaned, we can often arrange a joint booking discount so both properties benefit together.

Cleanliness and Care

We take great care to keep your property tidy throughout the cleaning process. Before we begin, we move garden furniture, ornaments, and plant pots out of the way and lay protective tarpaulins to ensure minimal mess. Downpipes are disconnected to prevent blockages, and we clean out your gutters, fascias, and soffits as part of the service. Before we leave, we also carry out a pure water window clean, leaving your glass spotless and your property looking its absolute best.

Our Commitment

We take pride in combining safety, quality, and reliability in every job. Whether your property is domestic or commercial, our fully insured and trained technicians ensure every roof is treated with care. We operate across Kent, offering a dependable service that prioritises your property's protection and long-term value.

Additional Services

Beyond roof cleaning and sealing, Evershine Roofcare offers a complete range of exterior cleaning services, including:

- Shop signage cleaning
- Gutter, fascia, and soffit washing
- Window cleaning and driveway pressure washing
- Long-lasting roof sealing and protective coatings

All work is carried out with the same professional standards and attention to detail that define our brand.
