BEARKAT® BK1

Have you ever heard of someone by the name of Benjamin Franklin? He is known for inventions like the lightening rod, the Declaration of Independence and a handful of wise sayings. For safety professionals though, his bifocal invention is his most noteworthy accomplishment and lives on with us today in the form of magnified protective eyewear. MCR Safety's magnifiers are made with impact protection, designed to stop a steel ball going 150 feet per second! In addition, they enhance workers overall vision and allow one to see the fine print!
