Physician's Order for Life Sustaining Treatment (POLST)

A Physician's Order for Life Sustaining Treatment (POLST) outlines a plan of care reflecting a patient's wishes concerning care at life's end.

Unlike traditional physician's orders, POLST is not bound to a particular site or care setting. Rather, the orders contained within a POLST must be honored across care settings and, hence, may be used by EMTs, physicians, nurses in the emergency department, hospitals, nursing facilities, and so forth.

In short, a POLST allows the physician's order regarding end of life care to travel with a patient as the patient moves between home, the hospital, long term care facilities, etc.

This is a voluntary form which must be signed by you (or your agent) and your physician. It indicates the types of life-sustaining treatment you do or do not want if you become seriously ill. POLST asks for information about your preferences for CPR, use of antibiotics, feeding tubes, etc. It helps translate into medical orders what must be followed in all healthcare settings.

What is a POLST?

Key Facts About POLST for Individuals and Family Members

Physician Orders for Life Sustaining Treatment (POLST) is a medical order that helps give people with serious illness more control over their care during a medical emergency. POLST can help make sure you get the care you want, and also protect you from getting medical treatments you DO NOT want.

- **POLST is voluntary.** Nursing homes and assisted living facilities may include POLST in their admission papers, but can't require you to complete a POLST if you do not wish to.
- POLST is for people who are seriously ill or have advanced frailty. If you are healthy, an advance directive is for you.
- A POLST does NOT replace an advance directive, which is still the best way to appoint someone you trust to act as your medical decisionmaker. A POLST works together with your advance directive, providing more specific detail regarding medical wishes and goals of care during a serious illness or at the end of life.
- The POLST form should be completed by your doctor or another trained medical provider after you've had a good conversation about the form's medical terms and options. This conversation is very important and should cover your overall health, your personal values, goals for your care, and treatment wishes. It can be helpful to include your family in the talk so they know and understand your treatment wishes.
- The POLST form is not valid until it is signed by both you (or your designated decisionmaker) <u>AND</u> your physician, nurse practitioner, or physician assistant.
- Once completed and signed, a copy goes in your medical record and you keep the
 original bright pink POLST. Wherever you go for medical care, the signed pink form
 should go with you. At home, keep your POLST in an easy to find place, like on your
 refrigerator, in case of a medical emergency.
- POLST does not expire, but it should be reviewed regularly to make sure your
 wishes haven't changed. You do not need to fill out a new POLST if you move from
 one facility to another, or change doctors. You only have to complete a new POLST if
 your treatment wishes change.
- POLST is a medical order, which means licensed medical providers are required to follow its instructions regarding CPR and other emergency medical care. The POLST form is printed on bright pink paper so it is easy to recognize, but photocopies are also considered valid.
- You can void your POLST form at any time, verbally or in writing. If you have changes, it is best to complete a new POLST. To void a POLST form, draw a line through sections A through D, write "VOID" in large letters, then sign and date the line.

Directions for Health Care Provider

Completing POLST

- Completing a POLST form is voluntary. California law requires that a POLST form be followed by healthcare providers, and provides immunity to those who comply in good faith. In the hospital setting, a patient will be assessed by a physician, or a nurse practitioner (NP) or a physician assistant (PA) acting under the supervision of the physician, who will issue appropriate orders that are consistent with the patient's preferences.
- **POLST does not replace the Advance Directive**. When available, review the Advance Directive and POLST form to ensure consistency, and update forms appropriately to resolve any conflicts.
- POLST must be completed by a health care provider based on patient preferences and medical indications.
- A legally recognized decisionmaker may include a court-appointed conservator or guardian, agent designated in an Advance Directive, orally designated surrogate, spouse, registered domestic partner, parent of a minor, closest available relative, or person whom the patient's physician/NP/PA believes best knows what is in the patient's best interest and will make decisions in accordance with the patient's expressed wishes and values to the extent known.
- A legally recognized decisionmaker may execute the POLST form only if the patient lacks capacity or has designated that the decisionmaker's authority is effective immediately.
- To be valid a POLST form must be signed by (1) a physician, or by a nurse practitioner or a physician assistant acting under the supervision of a physician and within the scope of practice authorized by law and (2) the patient or decisionmaker. Verbal orders are acceptable with follow-up signature by physician/NP/PA in accordance with facility/community policy.
- If a translated form is used with patient or decisionmaker, attach it to the signed English POLST form.
- Use of original form is strongly encouraged. Photocopies and FAXes of signed POLST forms are legal and valid. A copy should be retained in patient's medical record, on Ultra Pink paper when possible.

Using POLST

• Any incomplete section of POLST implies full treatment for that section.

Section A:

• If found pulseless and not breathing, no defibrillator (including automated external defibrillators) or chest compressions should be used on a patient who has chosen "Do Not Attempt Resuscitation."

Section B:

- When comfort cannot be achieved in the current setting, the patient, including someone with "Comfort-Focused Treatment," should be transferred to a setting able to provide comfort (e.g., treatment of a hip fracture).
- Non-invasive positive airway pressure includes continuous positive airway pressure (CPAP), bi-level positive airway pressure (BiPAP), and bag valve mask (BVM) assisted respirations.
- IV antibiotics and hydration generally are not "Comfort-Focused Treatment."
- Treatment of dehydration prolongs life. If a patient desires IV fluids, indicate "Selective Treatment" or "Full Treatment."
- Depending on local EMS protocol, "Additional Orders" written in Section B may not be implemented by EMS personnel.

Reviewing POLST

It is recommended that POLST be reviewed periodically. Review is recommended when:

- The patient is transferred from one care setting or care level to another, or
- There is a substantial change in the patient's health status, or
- The patient's treatment preferences change.

Modifying and Voiding POLST

- A patient with capacity can, at any time, request alternative treatment or revoke a POLST by any means that indicates intent
 to revoke. It is recommended that revocation be documented by drawing a line through Sections A through D, writing "VOID"
 in large letters, and signing and dating this line.
- A legally recognized decisionmaker may request to modify the orders, in collaboration with the physician/NP/PA, based on the known desires of the patient or, if unknown, the patient's best interests.

This form is approved by the California Emergency Medical Services Authority in cooperation with the statewide POLST Task Force.

For more information or a copy of the form, visit **www.caPOLST.org**.
