Auttie World's Mission

Making an Autism Spectrum difference Holistically and Artistically through arts, education, and research to improve the culture and lifestyle of the Autism Spectrum Disorder (ASD) individual.

Visual Art

- **Finger Painting Lessons**: This activity appeals to autistic children of all ages. Specific benefits include improvements in visual-spatial deficiencies, tactile sensory tolerance, and self-expression.

- **Painting Lessons**: It's amazing what springs forth from a hand that holds a paint brush. This type of art class improves manual dexterity and coordination, attention span, and self-expression. Extra advantages include increasing self-awareness and developing a sense of pride through accomplishments

Holistic Art

Plant Based enthusiast will interpret the "**Natural-Themed**" art projects as a way to stay connected to "*Mother Earth*". They will also view the artwork through the eyes of a *nutritionist* as they learn about earth ecology, human nature, and design.

Visual Holistic & Sustainable Arts Education

This brochure is designed with a "Visual Aide" to enhance the communities understanding about other forms of "Art".

Traditional and Non-Traditional Art

Researchers find activities like Art, Horticulture, and Holistic (**body, mind, and spirit**) practices can improve mental and physical health. The trio brings about increased physical activity, reduces stress and increases happiness. It also educates in better eating habits for your entire family…generations to come.

Plant Based Art

Our "**Veggie**" fun-filled art, will keep each camper curious and eager to do more! The nutrition comes with the sustainability approach to the foods we eat. Our Holistic Wellness Coach/Counselor will work with the Art Therapist to bring out the "**Naturist**" or "**Plant Based**" enthusiast in all our campers!
