About Private Markets Group Ltd (PMGL)

Private Markets Group Ltd is an ethnic minority owned, UK & emerging market focused forum organizer, institutional capital introducer & digital media publisher. Founded by Mr Okechukwu Onwuka Kalu, a third-generation member of The Kalu Family; our team has deep industry connections and expertise, we specialise in creating valuable networking opportunities for family offices, institutional investors, STEM fund managers, sports investors, technology developers, and innovation professionals.

Our mission is to facilitate meaningful relationships between public-private capital allocators and investment opportunities in Science, Technology, Engineering, Mathematics and Sports sectors. We work with the most reputable STEM, sports technology and innovation-focused operating platforms to establish capital raising relationships with leading family offices, sovereign wealth funds, pension funds, insurance companies, endowments, foundations, and institutional investors focused on technology and sports innovation located in the United Kingdom, Middle East, Africa, North America, Europe and APAC regions.

With years of experience in the institutional investment landscape, we have developed a reputation for hosting exclusive, high-calibre events that deliver exceptional value to participants. Our dedicated team of professionals ensures that each gathering provides optimal conditions for relationship building and knowledge exchange between allocators and STEM & Sports fund managers.

"Our forums are designed to create a conducive environment for meaningful dialogue between institutional allocators and STEM & Sports investment managers, facilitating partnerships that drive innovation and growth across global technology and sports markets."

- Jon Hemmings, COO of Private Markets Group Ltd

CEO Welcome Message

It is with great pleasure that I invite you to join us at The UK STEM & Sports Investment Forum & Exhibition.

This exclusive private event brings together the leading UK institutional allocators and global family offices that are actively investing for the long-term in Science, Technology, Engineering, Mathematics and Sports sectors including Quantum Computing, Artificial Intelligence, Biotechnology, Space Technology, Renewable Energy, Sports Technology, Athletic Performance Infrastructure, Digital Health, Robotics, Fintech, Cybersecurity, Clean Technology, Sports Analytics, E-Sports, Olympic Legacy projects, Stadium Development, Sports Medicine, and Wearable Technology.

C-Level Executives, Family Office Principals, Institutional STEM & Sports Investors, Technology Fund Managers, Sports Investment Funds & innovation professionals will come together to network, learn and discuss innovative opportunities, portfolio allocations and data-driven investment performance of STEM and Sports asset classes.

We are committed to promoting UK inward-outbound investment, inclusion and diversity across all technology and sports sectors, creating opportunities for underrepresented groups and emerging markets to participate in the global innovation economy.

We look forward to hosting you.

Kind regards,

Mr Okechukwu Onwuka Kalu

Founder & CEO

- E-sports and digital gaming platforms
- Olympic legacy and community sports facilities

Innovation & Emerging Technologies

- Wearable technology and health monitoring
- Virtual and augmented reality applications
- Sports broadcasting, Media technology & Sustainable sports infrastructure

Emerging & Alternative Asset Topics

The global STEM and Sports investment landscape is evolving rapidly, with new opportunities emerging across multiple technology and athletic performance sectors.

The UK STEM & Sports Investment Forum & Exhibition showcases cutting-edge investment categories that offer portfolio diversification, innovation potential and strategic advantages for forward-thinking institutional allocators committed to inclusion and diversity.

Sports Technology Innovation

SportsTech investments including performance analytics, wearable technology, virtual reality training systems, and digital fan engagement platforms.

This emerging sector provides opportunities for enhanced athletic performance, operational efficiency, and fan experience improvements while promoting diversity in sports participation.

Quantum & Advanced Computing

Quantum computing infrastructure, advanced semiconductor technology, artificial intelligence platforms, and machine learning systems. These investments benefit from government support, research partnerships, and increasing demand for computational power across all sectors.

Sustainable Innovation

Clean technology investments spanning renewable energy projects, sustainable manufacturing, environmental monitoring systems, and green infrastructure. This category represents stable, long-term investment opportunities with environmental impact, often supported by government incentives and ESG mandates.

Digital Health & Wellness

Telemedicine, AI platforms, digital therapeutics, health monitoring systems, and sports medicine innovations supporting population health and athletic performance. This asset class continues to benefit from demographic shifts and increasing focus on preventive healthcare.

Space & Defense Technology

Space exploration technologies, satellite systems, defense innovation, and aerospace engineering. These investments target critical national security and commercial space infrastructure required to support modern defense capabilities and space economy growth.

Educational Technology & Inclusion

EdTech platforms, digital learning systems, STEM education tools, and diversity-focused educational initiatives. These structures provide enhanced learning outcomes while promoting inclusion and diversity in STEM education and career pathways.

Structured & Strategic Investments

STEM Venture Capital Structures

Customized technology financing solutions combining seed funding, growth capital, and strategic partnerships to create bespoke risk-return profiles tailored to specific technology development projects and institutional innovation mandates.

Sports Infrastructure Asset-Backed Securities

Sports facility investments secured by underlying revenue streams from stadiums, training facilities, and sports complexes, offering yield enhancement and portfolio diversification through exposure to athletic performance and entertainment infrastructure.

Blended Innovation Finance Solutions

Public-Private technology development financing across multiple STEM sectors, providing liquidity solutions for innovators and entry opportunities for institutional investors seeking exposure to the technology development cycle.

UK Innovation Investment & International Capital Attraction

Foreign direct investment opportunities in UK STEM and Sports innovation projects, including quantum computing, biotechnology, sports technology, and clean energy investments for international institutional allocators, promoting UK inward-outbound investment flows.

Inclusion & Diversity Alignment

Diverse-led technology and sports investments with measurable inclusion and diversity outcomes, increasingly integrated into institutional ESG mandates and social impact investing strategies.

Direct Innovation Investments

Co-investment opportunities alongside STEM and Sports fund managers, allowing institutional allocators to deploy capital directly into selected technology and athletic performance projects.

Institutional Allocation

Multi-decade investment horizons focusing on innovation-driven STEM and Sports sectors with long-term growth potential and social impact.

Who You Will Meet

The UK STEM & Sports Investment Forum & Exhibition brings together an exceptional concentration of institutional investment decision-makers, technology asset managers, sports investors, and professional service providers focused on Science, Technology, Engineering, Mathematics and Sports sectors.

This exclusive gathering creates unparalleled networking opportunities with senior executives, portfolio managers, and strategic decision-makers who are actively deploying capital across UK and international STEM and Sports markets while promoting inclusion and diversity.
