

# Doxall™

Breakthrough antimicrobial formulations  
for a healthier world.  
Solutions for a wide range of industries to  
control harmful microorganisms.

**BRILLIANT  
SCIENCE.  
POWERED  
BY NATURE.**

## About Doxall™

Doxall™, a brand of Ten Carbon Chemistry Pty Ltd., unlocks the potential of naturally occurring fatty acids by making them water soluble without toxic solvents. That means high performance without toxic chemicals. Fatty acids found in everyday food are transformed through innovative manufacturing.

### Tough on germs

Sanitisers, antibacterial cleaners, disinfectant with COVID-19 claim (AUST L 352273).

### Industrial solutions

Antimicrobial protective coatings, odour control, crop protection, dust suppression.

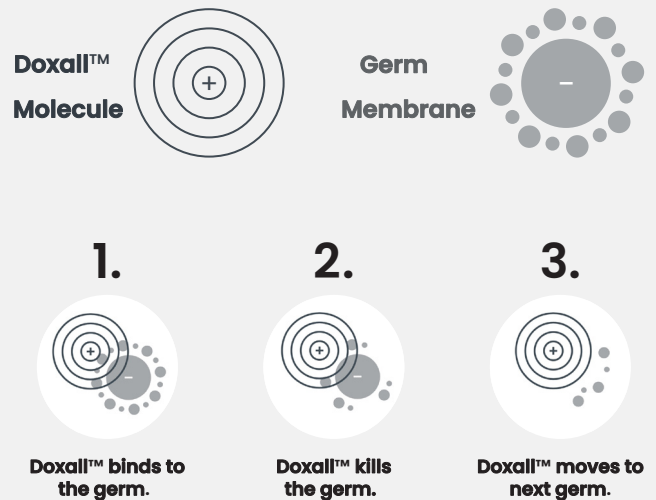

### ESG game changers

Sustainable ingredients with unparalleled safety. No QUATS. No alcohol. No peroxide. No bleach.

## How Doxall™ works

On application, Doxall™ bonds to surfaces and goes to work attracting and penetrating the germ membrane. A single Doxall™ molecule is a potent killer of germs and bacteria even in the face of real world dirt and grime.

## Assured by Testing

Our patented technology results from years of scientific research. Tested in multiple universities, independent labs and the real world. We welcome inquiries from potential development partners, resellers, and licensees.
