

5 WAYS BIOMAGNETIC THERAPY HELPS YOUR PET FEEL BETTER NATURALLY

A GENTLE, NON-INVASIVE APPROACH USED SUCCESSFULLY
ON DOGS, CATS, RABBITS, HORSES & OTHER ANIMALS

BY MICHELE STEELE COSTA, BIOMAGNETIC THERAPIST AT MYBIOMAG.COM

After Biomagnetic Therapy helped relieve Michele's chronic symptoms, she began using it with animals and saw great results. Pets respond calmly, and many owners notice clear improvements after just a few sessions and many animals show noticeable improvement after just one or two treatments

Here are five ways Biomagnetic Pair Therapy can support your pet:

Restores pH Balance

Magnets help rebalance acidity and alkalinity to support healing.

Reduces Pain and Inflammation

It can ease pain and inflammation to support comfort.

Supports Emotional Wellness

The Emotional Protocol helps animals feel calmer and less fearful.

Boosts Energy and Vitality

Many pets regain energy and playful movement.

Gentle & Convenient

Sessions are remote-friendly, non-invasive, and stress-free.

Ready to help your pet feel better? Schedule a session today.

Michele and her treatments have been a game changer for my thirteen year old beloved dog, Finn. Finn had a second crucial ligament tear months ago and, at his age of 13, we did not want to put him through what would be for him a brutal surgery. We knew this as we had been through the surgery years earlier when Finn had torn his cruciate in his other leg.

Through Biomagnetic Therapy, Michele has transformed my Finn's life. He has regained overall strength and is now able to enjoy his days so much since he began the treatments. His energy levels have dramatically improved and we are able to take our daily walks in the woods, which is something I never thought we would be able to do again. He is sleeping better, walking better, and his quality of life is much improved. Michele has given us a beautiful gift through her work and we don't have adequate words to thank her. She is a gifted, remarkable clinician and we will forever be in her debt!

Julie P. - Winchester, MA

Michele has treated both of our fur babies with remarkable results! I first reached out to her when our youngest dog, Leo, was having digestive issues. He was throwing up a lot and refusing to eat his food. The day after his first treatment, it was clear he was feeling much better. He was running and jumping around again, eating his food without issues, and sleeping less. By his second treatment, he was totally back to the normal, energetic puppy he was before!

When Leo's brother Nate started to have similar digestive issues, we reached out to Michele again. We had also found an engorged tick on Nate which was concerning. She treated him for the digestive trouble and for tick-related issues. That same night, Nate was eating and was back to his normal self!

Michele is so loving and compassionate. She takes her time to understand the symptoms and health history before diving into the treatment needs. The results speak for themselves! We find great peace knowing we have Michele to care for our fur babies and bring them back to their feisty, energetic selves! I highly recommend Michele for her amazing skills and compassion!
