BROCHURE ACCURACY

Colour reproduction in the brochure may vary slightly to the actual product however we have worked closely with our printer to ensure that any difference is minimal. The finishes are as accurate as the variables in the printing process.

Photography lifestyles and product shots by Stefan Biernat

Brochure design by Fiona Grimshaw – fmgcreative.co.uk

WELCOME

We have the looks to inspire with
no compromise!

We have gone all 'lifestyle' with this one... think look book, mood boards and interior design. This brochure is designed not only to showcase our fantastic range of products, but also to inspire you when making your all-important bathroom and kitchen choices.

Take a look at our traditional and contemporary basin or bath taps, our showers, kitchen taps and accessories – they all come in collections of beautiful designs and finishes to choose from.

We pride ourselves in exceptional quality, design and value for money. We feel sure this book will inspire you to make the right choice.

*Exceptional quality, design
and value for money*

■ EL/125/BB Ergo Lever Wall Mounted Basin Mixer (see page 60) and LUA/732/BB Lucca Glass Holder (see page 196)

Performance is key. Our products perform as well as they look.

To be able to offer this commitment of quality as standard, we are very specific about the manufacturers we use, and we ensure they have the same attention to detail in place that we want to offer to you the purchaser of our products.

Such is our confidence in our manufacturers, we offer a 10-year guarantee against manufacturing defects (excludes moving and serviceable parts, neglect and abuse).

We also offer a 10-year guarantee on the chrome plating.

All products are manufactured to the highest standards, which include BS5412, BS1010 and TMV2/TMV3.

Most products incorporate WRAS-approved components. Such is our commitment to quality and customer peace of mind.

QUALITY *Our commitment to quality is standard*

■ EL/109/BB Extended Monobloc Basin Mixer

ENVIRONMENT *& wellbeing*

We all know how precious water is to our general well-being, and how we can take steps ourselves to reduce the amount of water we use.

In our continued commitment to water wastage, we have developed eco filters that can be fitted to our products to restrict the number of litres per minute of water. As well as these filters there are Sensor taps, handsets and shower heads, all of which are, or can be, adapted to limit water usage where required.

We also strongly believe that our products should be manufactured and distributed by people who work in Safe and Healthy working conditions.

And we also want our products to have a minimal effect on the environment.

In our ongoing commitment to being environmentally aware, we endeavour to comply at all times with our Environmental Management Policy.

Environmental Management Policy

We have outlined several points, listed below, that we can follow to ensure we as a company continue to work toward our goal of being a greener company.

- Make sure that our environmental policies remain up-to-date with the current standard
- Minimisation of waste and maximisation of recycling of suitable packaging
- Compliance with all local and national environmental policies
- Recycling of damaged and/or unsaleable goods
- To inform and educate the employees of these policies and listen to and include any ideas they may have
- Allow our suppliers and customers who have an interest in our impact on the environment to send us their comments and suggestions
- To update our products to better aid our environmental goals
- Ensure that these guidelines are readily available to all employees and anyone who requires them.

In our ongoing commitment to being environmentally aware, we endeavour to comply at all times with our Environmental Management Policy.

WHICH SYSTEM?

Before choosing your showering system be sure to determine the system you have installed in your home so that the system you choose will work to its maximum performance.

Low Pressure System

If you have a hot water storage cylinder in your airing cupboard and a cold water tank in the loft you will have a low pressure system. If you run this without a pump you can choose any product displaying this Low Pressure icon.

hot water cylinder
installed in the airing
cupboard

cold water tank
installed in the loft

Unvented Cylinder

If you have a hot water cylinder in your airing cupboard with an expansion tank and no cold water tank in the loft. You can choose any product with the High Pressure icon. Shower systems suitable for gravity fed and combi boilers can also be used on a high pressure system.

Combination Boilers

If you have no water storage and a boiler in your kitchen/garage (usual places) you will more than likely have a combi boiler, which instantly heats mains fed cold water and you will not need a storage tank. Choose any product displaying this icon. Products suitable for gravity fed and unvented installations may also be used with combi boilers.

Pumped Systems

If you have a cold water tank in the loft and a booster pump fitted to your system, your system will be pumped and you can choose any product displaying the High pressure icon. Please check the minimum recommended pressure meets your pump requirements. Products suitable for gravity fed and unvented installations may also be used with shower pumps.

Water pressure

These symbols appear throughout the brochure next to our products as a reminder to check the suitability of the tap or shower to your water pressure.

Check your water pressure!

Something for everyone...

FINISHES

Introducing...

Along with our ever-popular Antique Gold bespoke finish. Sagittarius are pleased to announce they have added Satin Gold, Brushed Gold, Matt Black, Satin Chrome, Brushed Nickel, and Satin Nickel finishes, to complement their comprehensive brassware portfolio.

All special finish orders have a 21 day turnaround time (subject to plating compatibility – Please contact the sales office for clarification).

We are also pleased to announce that the full Churchmans range, along with matching traditional showers and wastes. Will now be available as a fully stocked range and can be dispatched on a next day delivery service.

Please scan the QR code below, for a retail price list of products in all finishes.**

** Please note – All products cannot have an RRP price due to compatibility confirmation. Any missing items that require a price, can be obtained from via calling the sales team.

Smooth and modern, the **Shero** is another one of the new ranges in our collection. Understated mixed with overstated gives that perfect match while daring to be different. The extended monobloc tap shown here is elegant when paired with a (pink!) countertop basin.

DECK MOUNTED INFRA-REDS

CHROME

Introducing our electronic Infra-red Sensor Taps. These basin mixers are single feed taps, ideal for use with the thermostatic under counter water blending valves (AC771) 15mm or (AC772) 22mm, which allows you to control water temperature.

A

B

C

D

E

F

G

H

This Infra-red is self powered with a built in battery.

- Reliable, easy to use system
- Hygienic – the touch free system helps avoid the spread of germs and bacteria
- Water efficiency – water supply is triggered by the detection of movement, which also helps remove the risk of flooding.

Infra-Reds Range is available in Chrome finish only.

BOILING WATER TAPS

Boiling
water tap
98°C

Three-in-one boiling water tap. Instant boiling hot water on demand whenever it is required, but with the added functionality of being a conventional kitchen sink mixer. The boiling water is drawn via the left handle that has a safety lock mechanism. Whilst the right hand handle operates the mixers hot and cold supply. The tank has a 2.4 litre capacity with a digital touch-screen for temperature adjustment.

Boiler and Filter System

FEATURES:

- The tanks temperature is adjustable from 80 to 98 degrees
- Normal hot and cold water via the lever (Filtered Cold Water on BW/255/C Model)
- Tank capacity – 2.4 litres
- Chrome finish
- All brass mixer tap with swivel spout
- Safety lock on the boiling water handle
- Both come with an inline filter, that is fitted before the boiler to help protect against limescale. And will help prolong the life of the tank.
- Minimum 1.5 bar water pressure – 5.0 Bar Maximum Water Pressure (Recommended Ideal Pressure 2.5 Bar)
- 2 year guarantee

▶ Chrome (C)

DIMENSIONS:

- Overall height – 352mm
- Spout exit height – 225mm
- Projection – 192mm

I.	REA/741/C	Rectangular Brass Two Tier Shower Tidy (700 x 260 x 130mm)	285	x	x

Sagittarius products are all tested before despatch and a 10 year guarantee covers any defect in manufacture.

Chromium plate finishes also carry a 10 year guarantee. As gold finishes are softer, special care must be taken when cleaning and a 1 year guarantee is given.

WARRANTY

1. The Supplier warrants that goods sold shall:

- (a) conform in all material respects with their description;
- (b) be free from material defects in design, materials and workmanship.

2. Subject to 3 and 4 below, if:

(a) the Customer gives notice in writing to the Supplier within a reasonable time of discovery that some or all of the goods purchased do not comply with the warranty set out in 1 above; (b) the Customer supplies the Supplier with a copy of the invoice for the relevant goods;

(c) the Supplier is given a reasonable opportunity of examining such goods; and

(d) the Customer allows the Supplier to collect such goods during the Supplier's normal business hours, the Supplier shall, at its option, repair or replace any defective goods supplied or refund the price of the defective goods in full at the price paid for such goods by the Customer.

3. The remedy detailed in 2 above shall only be available to the Customer if the defect in question shall have:

(a) been apparent on inspection of the goods on delivery where the defect relates to serviceable or moving parts, including, without limitation, valves, washers and slide brackets;

(b) appeared within 10 years from the date on which the goods are deemed to have been delivered to the Customer where the defect is a casting or manufacturing defect or a chrome plating or nickel finish defect; or

(c) appeared within 12 months from the date on which the goods are deemed to have been delivered to the Customer where the defect is a gold plating defect or relates to anything not covered under 3(a) or 3(b) above.

4. The Supplier shall not be liable for failure of any goods to comply with the warranty set out in 1 above in any of the following events: (a) the Customer makes any further use of such goods after giving notice in accordance with 2 above;

(b) the Customer alters or repairs such goods (or attempts so to do) without the prior written consent of the Supplier;

(c) the goods are fitted by any person who is not a plumber registered with The Chartered Institute of Plumbing and Heating Engineers or The Institute of Plumbing;

(d) the defect arises because the Customer failed to follow the Supplier's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the goods or (if there are none) good trade practice regarding the same;

(e) where the defect relates to the finishing of the goods, if it arises as a result of the Customer using anything other than water and a soft cloth to clean the goods;

(f) the goods in question have not been serviced and maintained properly and in accordance with the Supplier's recommendations and/or have been fitted with any parts, components or accessories that have not been manufactured or recommended by the Supplier;

(g) the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or

working conditions; or

(h) the goods differ from their description as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

5. Where the Customer claims or proposes to make a claim against the Supplier for making good any damage or loss caused by or claimed to be caused by defective goods the Customer shall not remedy (either itself or via a third party) or make any attempt to remedy such damage or loss so caused or claimed to be caused unless the Supplier has given prior authorisation.

6. Except as provided in this clause 6, the Supplier shall have no liability to the Customer in respect of the goods' failure to comply with the warranty set out in 1 above.

7. The terms implied by sections 13 to 15 of the Sale of Goods Act 1979 are, to the fullest extent permitted by law, excluded from the Contract.

8. This warranty shall apply to any repaired or replacement goods supplied by the Supplier.

In the interest of continual design, development and product improvement we reserve the right to amend or adjust specifications at any time. Where an identical product is no longer available we will supply the nearest equivalent from our then current range. This warranty does not extend to any item rendered defective by faulty installation, inappropriate use and accidental damage after purchase, nor does it cover normal wear and tear.

GUARANTEE OVERVIEW

Please find below a breakdown of what products and parts are covered by what period of guarantee. All technical support related queries will require the original purchase invoice number.

10 Year Guarantee

Bathroom Taps – Kitchen Taps & Shower Valves – All bathroom taps in both deck and wall mounted designs. All shower valves in exposed and concealed designs.

The 10 year guarantee on these products covers manufacturing defects such as casting faults or chromium plating issues (Excludes Moving-serviceable parts).

Chromium plating guarantee is void if any household cleaners or harsh abrasives are used.

We recommend only warm water and a soft cloth for cleaning both Chrome and Gold finishes.

Fixed Head Kits – Our fixed head shower kits carry a 10 year guarantee against manufacturing fault or chromium plating issues.

Rigid Riser Kits – Rigid riser kits carry a 10 year guarantee against manufacturing fault and chromium plating issues.

Diverter sections are classed as moving-serviceable parts and have a 3 year guarantee.

Shower Hoses and Handsets are also classed as moving-serviceable parts and are restricted to a one year guarantee.

Showering additions – On all shower additions which come under the following categories: Ceiling Arms, Bath Mounted Handset Kits (Excluding Hoses) Isolating-Non return valves, Ancillary Items & Body Jets. We offer a 10 year guarantee against manufacturing defects.

Wall Spouts – All wall spouts have a 10 year guarantee against manufacturing fault or chromium plating issues.

3 Year Guarantee

Accessories – We offer a one year guarantee on all Bathroom accessory ranges.

Infra Red Mixers – Infra Red mixers have a 3 year guarantee against manufacturing fault or chromium plating issues.

Slide Rail Kits – Our Slide rail kits carry a 3 year guarantee against manufacturing fault or chromium plating issues.

Hoses, Handsets & Slider brackets are classed as moving-serviceable parts and have a restriction to a one year guarantee.

Grab Bars – Shower seats – All grab bars and shower seats have a 10 year guarantee against manufacturing fault or chromium plating issues.

All Wastes including Bottle traps – We offer a 3 year guarantee against manufacturing fault or chromium plating issues.

Chromium plating guarantee is void if any household cleaners or harsh abrasives are used.

Serviceable Parts – We offer a three year guarantee on all thermostatic cartridges, ceramic disc valves and any other operational valves such as diverters an on-off valves against manufacturing failure. We will replace any failed parts if the cause of failure is down to manufacturing. If the cause of failure is due to poor maintenance or neglect, then replacement parts can be purchased to remedy any issues.

1 Year Guarantee

Trigger Spray Sets* – We offer a 3 year guarantee against manufacturing fault or chromium plating issues.

Hoses are classed as moving-serviceable parts and have a restriction to a one year guarantee.

Trigger Spray sets are NOT designed to be always left under pressure. So, it is important that they are fitted in conjunction with a shower valve or isolating valve, to ensure after use it can be completely turned off.

Gold Plating – The gold plating finish on our brassware is a specialised finish and in view of this we offer a 1 year guarantee on the finish*

Gold plating guarantee is void if any household cleaners or harsh abrasives are used. Only warm water and a soft cloth should be used after every use to maintain the gold finish.

Shower Accessories & Storage Baskets – All wire storage baskets & accessories have a one year guarantee.

Handsets – Single & Multi mode handsets are classed as moving-serviceable parts and have a restriction to a one year guarantee.

Shower Hoses – Shower hoses are classed as moving-serviceable parts and have a restriction to a one year guarantee.

ADDITIONAL INFORMATION

The reference to "Manufacturing fault" is when a product incurs a casting fault causing a product to leak or fail, or the Chromium finish develops an issue. Serviceable-Moving parts are also covered but these parts will only be considered once the Sagittarius Technical department has been contacted and they have approved the parts under warranty.

Sagittarius Limited will replace free of charge any product or part they deem to be a manufacturing defect.

They will however NOT be liable for any plumbing costs incurred whether under warranty or not.

If however a product reported as faulty to the technical or sales team, if there is evidence of neglect by way of condition-appearance then we reserve the right to rescind the warranty coverage if applicable.
