

PICU Workflow

- Receive AM/PM Report (BBCH, PICU, etc.)
 - Check Orders, EOC, Sign-in to pts/unit
- Check supplies in Respiratory Clean Supply in PICU
 - HFNC, Dragers-Neo & Pedi, Transport Hamilton, Albuterol syringe pumps x2, C-MAC and blades, storeroom supplies, amber bins, temp probes, neo flow sensors
- Verify that the ABL90 is all Green or address any issues as needed.
 - Email Kat and/or Beth Ruel for missing consumables, call POCT for troubleshooting help
- Verify transport EtCO₂ monitor is plugged- in and charging
- Safety checks on all patients. Bag/masks open and plugged in to flowmeter off blender, vents plugged in to red outlets, vuelink cables connected and functioning, EtCO₂ monitoring on all vents, etc.
 - Blenders set at 100%, unless otherwise ordered.
- Call Charge RT to verify RT PICU transport availability before Shift Census huddle.
- Attend Shift Census huddle @ 0750 & 2100
- Attend AM/PM rounds

- Respond to any Medical Alerts; rapid response, codes, and BPEWS on BBCH/PICU
